ISO 11040-6:2019 (E)

Prefilled syringes — Part 6: Plastic barrels for injectables and sterilized subassembled syringes ready for filling

Contents

Foreword

Introduction

1 Scope

2 Normative references

3 Terms and definitions

4 General requirements

- 4.1 Quality systems
- 4.2 Testing
- 4.3 Documentation

5 Dimensions and designation

- 5.1 Design including dimensions
- 5.2 Design requirements
- 5.2.1 Head design
- 5.2.2 Dead space
- 5.2.3 Functional testing of Luer cone/Luer lock connection
- 5.2.4 Flange breakage resistance
- 5.2.5 Syringe tip breakage resistance

6 Requirements

- 6.1 General
- 6.2 Material
- 6.2.1 General
- 6.2.2 Duty of notification concerning modifications to polymers
- 6.2.3 Needle
- 6.2.4 Closure system
- 6.2.5 Closure system integrity
- 6.3 Physical requirements
- 6.3.1 Sterilization
- 6.3.2 Clarity and transparency
- 6.3.3 Particulate contamination
- 6.3.4 Lubricants
- 6.4 Chemical requirements
- 6.5 Endotoxins and biological requirements

7 Graduation

8 Packaging and labelling

Annex A (informative) Examples of types of sterilized subassembled syringes ready for filling

- A.1 Components
- A.2 Description of closure systems
- A.2.1 General
- A.2.2 Closures for syringes with Luer cone in accordance with ISO 80369-7
- A.2.3 Closures for syringes with Luer lock adaptor in accordance with ISO 80369-7
- A.2.4 Closures for syringes with integrated Luer lock in accordance with ISO 80369-7
- A.2.5 Syringe with staked needle

Annex B (informative) Head designs

Annex C (normative) Test methods for syringe barrels

C.1 Flange breakage resistance
C.1.1 Principle
C.1.2 Materials
C.1.3 Apparatus
C.1.4 Preparation and preservation of test samples
C.1.5 Procedure
C.1.6 Expression of results
C.1.7 Test report
C.2 Luer cone breakage resistance
C.2.1 Principle
C.2.2 Materials
C.2.3 Apparatus
C.2.4 Procedure
C.2.5 Expression of results
C.2.6 Test report

Annex D (informative) Sample preparation for endotoxin and particulate determination

D.1 Endotoxins
D.1.1 General
D.1.2 Materials and equipment
D.1.3 Procedure
D.2 Particulates
D.2.1 General
D.2.2 Materials and equipment
D.2.3 Procedure

Annex E (informative) Evaluation of syringe lubrication by glide force test method

E.1 Purpose
E.2 Materials
E.3 Apparatus
E.4 Procedure
E.5 Test report

Annex F (informative) Needle penetration test

F.1 Principle
F.2 Apparatus
F.3 Materials
F.4 Procedure
F.5 Test report

Annex G (normative) Test methods for syringe closure systems

G.1 Needle pull-out force
G.1.1 Principle
G.1.2 Materials
G.1.3 Apparatus
G.1.4 Preparation and preservation of test samples
G.1.5 Procedure
G.1.6 Expression of results
G.1.7 Test report
G.2 Syringe closure system liquid leakage test
G.2.1 Principle
G.2.2 Reagents and materials
G.2.3 Apparatus
G.2.4 Preparation and preservation of test samples
G.2.5 Procedure
G.2.6 Expression of results
G.2.7 Test report
G.3 Luer lock adaptor collar pull-off force
G.3.1 Principle
G.3.2 Materials

G.3.3 Apparatus
G.3.4 Preparation and preservation of test samples
G.3.5 Procedure
G.3.6 Expression of results
G.3.7 Test report
G.4 Luer lock adaptor collar torque resistance
G.4.1 Principle
G.4.2 Materials
G.4.3 Apparatus
G.4.4 Preparation and preservation of test samples and test pieces
G.4.5 Procedure
G.4.6 Expression of results
G.4.7 Test report
G.5 Luer lock rigid tip cap unscrewing torque
G.5.1 Principle
G.5.2 Materials
G.5.3 Apparatus
G.5.4 Preparation and preservation of test samples and test pieces
G.5.5 Procedure
G.5.6 Expression of results
G.5.7 Test report
G.6 Pull-off force of the tip cap or the needle shield
G.6.1 Method 1
G.6.1.1 Principle
G.6.1.2 Materials
G.6.1.3 Apparatus
G.6.1.4 Procedure
G.6.1.5 Expression of results
G.6.1.6 Test report
G.6.2 Method 2
G.6.2.1 Principle
G.6.2.2 Materials
G.6.2.3 Apparatus
G.6.2.4 Procedure
G.6.2.5 Test report

Annex H (informative) Dye solution tightness test

H.1 General
H.2 Principle
H.3 Apparatus, equipment, and reagents
H.4 Preparation and preservation of test samples and test pieces
H.5 Procedure
H.6 Test report

Annex I (informative) Guidance on materials

Page count: 53
