ISO 21316:2019 (E)

Traditional Chinese medicine — Isatis indigotica root

Contents

Foreword

Introduction

1 Scope

2 Normative references

3 Terms and definitions

4 Descriptions

5 Requirements

- 5.1 Morphological features
- 5.1.1 Appearance
- 5.1.2 Colour
- 5.1.3 Dimension
- 5.1.4 Stem residue
- 5.1.5 Texture
- 5.1.6 Fracture
- 5.1.7 Odour
- 5.2 Moisture
- 5.3 Total ash
- 5.4 Acid-insoluble ash
- 5.5 Ethanol-soluble extractives
- 5.6 Identification of maker compound
- 5.7 Content of marker compound
- 5.8 Heavy metals
- 5.9 Pesticide residues

6 Sampling

7 Test methods

- 7.1 Macroscopic identification
- 7.2 Determination of moisture content
- 7.3 Determination of total ash content
- 7.4 Determination of acid-insoluble ash content
- 7.5 Determination of ethanol-extractives content
- 7.6 Thin-layer chromatogram (TLC) identification
- 7.7 Determination of marker compound content
- 7.8 Determination of heavy metals contents
- 7.9 Determination of pesticide residues contents

8 Test report

9 Packaging, storage and transportation

10 Marking and labelling

Annex A (informative) Determination of ethanol-soluble extractives

Annex B (informative) Thin-layer chromatogram (TLC) identification

- B.1 Preparation of test solution and reference solutions
- B.2 Developing solvent system

B.3 Procedure

Annex C (informative) Determination of (R,S)-goitrin content

C.1 Preparation of reference standard solution
C.2 Preparation of test solution
C.3 Chromatographic system
C.4 Content calculation of (R,S)-goitrin

Annex D (informative) National and regional limits of moisture, total ash, acid-insoluble ash, (R,S)-goitrin and ethanol-soluble extractive contents in Isatis indigotica root
