ISO 23500-2:2019 (E)

Preparation and quality management of fluids for haemodialysis and related therapies — Part 2: Water treatment equipment for haemodialysis applications and related therapies

Contents

Foreword

Introduction

1 Scope

1.1 General
1.2 Inclusions
1.3 Exclusions

2 Normative references

3 Terms and definitions

4 Requirements

4.1 Dialysis water quality requirements
4.1.1 General
4.1.2 Chemical contaminant requirements
4.1.3 Organic Carbon, pesticides and other chemicals
4.1.4 Microbiology of dialysis water
4.2 Water treatment equipment requirements
4.2.1 General
4.2.1.1 Water treatment system
4.2.1.2 Materials compatibility
4.2.1.3 Regenerated or reconstituted devices
4.2.1.4 Disinfection protection
4.2.2 Backflow prevention device
4.2.3 Tempering valves
4.2.4 Sediment filters
4.2.5 Cartridge filters
4.2.6 Softeners
4.2.7 Anion exchange resin tank
4.2.8 Carbon media
4.2.9 Chemical injection systems
4.2.10 Reverse osmosis
4.2.11 Deionization
4.2.12 Bacteria and endotoxin retentive filters
4.2.13 Storage and distribution of dialysis water
4.2.13.1 Piping systems
4.2.13.2 Storage tanks
4.2.13.3 Ultraviolet irradiators
4.2.13.4 Hot water disinfection systems
4.2.13.5 Ozone disinfection systems

5 Testing

5.1 Conformity with dialysis water quality requirements
5.1.1 General
5.1.2 Microbiology of dialysis water
5.1.3 Maximum level of chemical contaminants
5.2 Conformity with water treatment equipment requirements
5.2.1 General
5.2.1.1 Water treatment system
5.2.1.2 Materials compatibility

5.2.1.3 Regenerated or reconstituted devices
5.2.1.4 Disinfection protection
5.2.2 Backflow prevention devices
5.2.3 Tempering valves
5.2.4 Sediment filters
5.2.5 Cartridge filters
5.2.6 Softeners
5.2.7 Anion exchange resin tanks
5.2.8 Carbon media
5.2.9 Chemical injection systems
5.2.10 Reverse osmosis
5.2.11 Deionization
5.2.12 Endotoxin retentive filters
5.2.13 Storage and distribution of dialysis water
5.2.13.1 Piping systems
5.2.13.2 Storage tanks
5.2.13.3 Ultraviolet irradiators
5.2.13.4 Hot water disinfection systems
5.2.13.5 Ozone disinfection systems

6 Labelling

6.1 General
6.2 Device markings
6.3 Product literature

Annex A (informative) Rationale for the development and provisions of this document

A.1 Scope
A.2 Requirements
A.2.1 Dialysis water quality requirements
A.2.1.1 General
A.2.1.2 Chemical contaminants
A.2.1.3 Microbiological contaminants
A.2.2 Water treatment equipment requirements
A.2.2.1 General
A.2.2.1.1 Water treatment system
A.2.2.1.2 Materials compatibility
A.2.2.1.3 Regenerated or reconstituted devices
A.2.2.1.4 Disinfection protection
A.2.2.2 Backflow prevention device
A.2.2.3 Tempering valves
A.2.2.4 Sediment filters
A.2.2.5 Cartridge filters
A.2.2.6 Softeners
A.2.2.7 Anion exchange resin tank
A.2.2.8 Carbon media
A.2.2.9 Chemical injection systems
A.2.2.10 Reverse osmosis
A.2.2.11 Deionization
A.2.2.12 Endotoxin retentive filters
A.2.2.13 Storage and distribution
A.2.2.13.1 Piping systems
A.2.2.13.2 Storage tanks
A.2.2.13.3 Ultraviolet irradiators
A.2.2.13.4 Hot water disinfection systems
A.2.2.13.5 Ozone disinfection systems
A.2.2.13.6 Sodium hypochlorite disinfection
A.3 Testing
A.3.1 Conformity with dialysis water quality requirements — Microbiology of dialysis water
A.3.2 Conformity with water treatment equipment requirements — Materials compatibility
A.4 Labelling

Annex B (informative)
