## Traditional Chinese medicine — Detection of irradiated natural products by photostimulated luminescence

---

### Contents

	Foreword
	Introduction
1	Scope
2	Normative reference
3	Terms and definitions
4	Principle
5	Apparatus
6	Procedure
6.1	General
6.2	Sampling technique
6.2.1	General operation
6.2.2	Sample quantity
6.3	Instrumental calibration
6.3.1	Instrumental parameter
6.3.2	Dark count
6.3.3	Empty chamber test
6.3.4	Negative reference count
6.3.5	Positive reference count
6.4	Detection of the sample
6.4.1	Screening PSL
6.4.2	Calibrated PSL
6.4.3	F-factor calculating
6.5	Result evaluation
7	Other requirements
7.1	Limitation of application
7.2	Repeated determination
7.3	Cleaning of sample chamber
7.4	Cleaning of translucent glass
7.5	Influencing factors of threshold and F-factor
