ISO/TS 22691:2021 (E)

Health informatics — Token-based health information sharing

Contents

Foreword

Introduction

1 Scope

2 Normative references

3 Terms and definitions

4 Data items in HI-TOKEN

4.1 Overview
4.2 Item definitions

5 Data types and value representations in HI-TOKEN

5.1 Overview
5.2 Data types and value representations

6 Exchange format of HI-TOKEN

6.1 Overview
6.2 Electronic representation
6.3 Machine-readable optical representation
6.4 Printed text representation

7 Security considerations

7.1 General considerations
7.1.1 Overview
7.1.2 HI-TOKEN
7.1.3 Documents stored in the information repository
7.1.4 Data transfer
7.1.5 Encryption
7.1.6 Authentication and authorization
7.1.7 Logging
7.2 Specific requirements

8 Guidance for establishing a HI-community token sharing policy

Annex A (informative) Comparison of IHE XDS/XDR and token-based health information sharing use cases

A.1 Overview
A.2 Overview: IHE XDS
A.3 Overview: IHE XDR
A.4 Overview: IHE MHD and “XDS on FHIR”
A.5 Token-based health information sharing

Annex B (informative) Data flow of token-based health information sharing

B.1 Overview
B.2 Dataflow
B.3 Examples of the using token-based health information sharing
B.3.1 Sender facility:exporter / uploader
B.3.2 Data center:repository
B.3.3 Recipient facility:downloader / importer
