## Molecular in vitro diagnostic examinations - Specifications for pre-examination processes in metabolomics in urine, venous blood serum and plasma

---

<b>Contents</b>		<b>Page</b>
Foreword .....		iv
Introduction .....		v
1	Scope .....	1
2	Normative references .....	1
3	Terms and definitions .....	1
4	General considerations .....	3
5	Urine .....	4
5.1	Outside the laboratory .....	4
5.1.1	Urine collection .....	4
5.1.2	Transport requirements .....	5
5.2	Inside the laboratory .....	5
5.2.1	Specimen reception .....	5
5.2.2	Storage requirements .....	6
5.2.3	Urine sample processing .....	6
5.2.4	Long-term storage requirements for urine samples .....	6
5.2.5	Urine thawing .....	6
6	Blood .....	7
6.1	Outside the laboratory .....	7
6.1.1	Primary collection .....	7
6.1.2	Transport of pre-processed specimens to laboratory .....	8
6.2	Inside the laboratory .....	8
6.2.1	Specimen reception .....	8
6.2.2	Sample processing .....	9
6.2.3	Transport of processed samples to a laboratory for metabolomics analysis or transport to a biobank .....	9
6.2.4	Long-term storage requirements .....	9
6.2.5	Serum and plasma thawing and use .....	10
Annex A (informative)	Instability of the metabolome .....	11
Bibliography .....		17
