ISO 21917:2021 (E)

Anaesthetic and respiratory equipment — Voice prostheses

Contents

Foreword

Introduction

1 Scope

2 Normative references

3 Terms and definitions

4 General requirements

5 Materials

5.1 General
5.2 Biological safety of gas pathways

6 Design requirements

6.1 General requirements
6.2 Valve leakage
6.3 Valve opening pressure
6.4 Characteristic curves

7 Requirements for voice prostheses supplied sterile

8 Packaging of voice prostheses supplied sterile

9 Information supplied by the manufacturer

9.1 General requirements
9.2 Marking
9.3 Instructions for use

Annex A (informative) Rationale

A.1 Introduction
A.2 Rationale for Clause 1 — Scope
A.3 Rationale for subclause 6.2 — Valve leakage
A.4 Rationale for subclause 6.3 — Valve opening pressure
A.5 Rationale for subclause 6.4 — Characteristic curves

Annex B (normative) Test methods

B.1 General
B.2 Apparatus
B.3 Test method for valve leakage
B.3.1 Principle
B.3.2 Procedure
B.3.3 Presentation of test results
B.4 Test method for determining the valve opening pressure
B.4.1 Principle
B.4.2 Procedure
B.4.3 Presentation of test results
B.5 Test method to generate the characteristic curve
B.5.1 Principle
B.5.2 Procedure
B.5.3 Presentation of test results
