Traditional Chinese medicine - General requirements for manufacturing procedures and quality assurance of granules

Contents	Page
Foreword	iv
Introduction	v
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 General requirements of manufacturing procedures	3
4.1 General	3
4.2 Crushing	4
4.3 Extraction	4
4.4 Liquid-solid separation	5
4.5 Concentration and drying	5
4.6 Granulation	6
4.6.1 General	6
4.6.2 Dry granulation	6
4.6.3 Semi-dry granulation	7
4.6.4 Wet granulation	7
4.7 Compaction	8
4.8 Packaging and labelling	8
5 General requirement of quality assurance	8
5.1 General	8
5.2 Equivalency evaluation	9
5.3 Identification	9
5.4 Assay	9
5.5 Particle size and particle size distribution	9
5.6 Dissolution or disintegration test	9
5.7 Determination of water or moisture content	9
5.8 Uniformity of dosage units	10
6 Requirements of safety tests	10
6.1 Pesticide residues	10
6.2 Heavy metals	10
6.3 Aflatoxins	10
6.4 Microorganism	10
Annex A (informative) Production, quality and selection of crude drugs	11
Annex B (informative) Particle size distribution	12
Annex C (informative) Equivalency evaluation	13
Annex D (informative) Determination of the content of methanol-soluble extractives	15
Bibliography	17
