ISO/TR 24484:2023-01 (E)

Female condoms - Use of ISO 25841 and the quality management of female condoms

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Termsanddefinitions 1

4 Quality of design 2
4.1 General 2
4.2 Design input and design development 2
4.2.1 General 2
4.2.2 Barrier sheath 3
4.2.3 Product insertion feature and retention feature 3
4.2.4 Dressing materials 4
4.2.5 Lubricants 4
4.2.6 Biocompatibility 4
4.2.7 Control of bioburden 4
4.2.8 Packaging 4
4.3 Design verification 5
4.4 Design validation 5
4.4.1 Evaluation of barrier properties 5
4.4.2 Clinical (human use) investigations 5
4.4.3 Stability studies and shelf-life claim 5
4.5 Design output 6
4.5.1 General 6
4.5.2 Details of materials 6
4.5.3 Specifications of the female condoms 6
4.5.4 Supporting information 7
4.5.5 Regulatory compliance 7
4.6 Design transfer 7
4.7 Validation and change controls 7

5 Risk management 7

6 Quality in manufacture 8

7 Quality in testing 10
7.1 General 10
7.2 Test equipment 11
7.3 Sampling and testing: 11
7.4 Training and competence of personnel in testing 11
7.5 Review of results and reports: 11

8 Quality in procurement 12

9 Handling and disposal of used female condoms 12
