## Female condoms - Use of ISO 25841 and the quality management of female condoms

---

<b>Contents</b>		<b>Page</b>
Foreword .....		iv
Introduction .....		v
1	Scope .....	1
2	Normative references .....	1
3	Terms and definitions .....	1
4	Quality of design .....	2
4.1	General .....	2
4.2	Design input and design development .....	2
4.2.1	General .....	2
4.2.2	Barrier sheath .....	3
4.2.3	Product insertion feature and retention feature .....	3
4.2.4	Dressing materials .....	4
4.2.5	Lubricants .....	4
4.2.6	Biocompatibility .....	4
4.2.7	Control of bioburden .....	4
4.2.8	Packaging .....	4
4.3	Design verification .....	5
4.4	Design validation .....	5
4.4.1	Evaluation of barrier properties .....	5
4.4.2	Clinical (human use) investigations .....	5
4.4.3	Stability studies and shelf-life claim .....	5
4.5	Design output .....	6
4.5.1	General .....	6
4.5.2	Details of materials .....	6
4.5.3	Specifications of the female condoms .....	6
4.5.4	Supporting information .....	7
4.5.5	Regulatory compliance .....	7
4.6	Design transfer .....	7
4.7	Validation and change controls .....	7
5	Risk management .....	7
6	Quality in manufacture .....	8
7	Quality in testing .....	10
7.1	General .....	10
7.2	Test equipment .....	11
7.3	Sampling and testing: .....	11
7.4	Training and competence of personnel in testing .....	11
7.5	Review of results and reports: .....	11
8	Quality in procurement .....	12
9	Handling and disposal of used female condoms .....	12
Bibliography .....		13
