

ISO 24190:2023-05 (E)

Biotechnology - Analytical methods - Risk-based approach for method selection and validation for rapid microbial detection in bioprocesses

Contents		Page
Foreword		v
Introduction		vi
1	Scope	1
2	Normative references	1
3	Terms and definitions	1
4	General considerations	7
5	Risk management for microbiological contamination	7
5.1	Risk management in manufacturing process	7
5.2	Risk management in microbial testing	8
6	Selection of a fit-for-purpose assay	9
6.1	General	9
6.2	Assay selection	10
6.3	Kit or system selection	10
6.4	Considerations for various test types	11
6.5	User requirement specifications	12
6.5.1	General	12
6.5.2	Speed	12
6.5.3	Sample volume	12
6.5.4	In-process versus final release testing	12
6.5.5	Specificity	12
6.5.6	Sensitivity	13
7	Validation	13
7.1	General concepts	13
7.2	Selection of microorganisms for validation	14
7.3	Quality by design of method validation	15
7.4	Revalidation method	15
7.5	System validation	16
7.6	Use of reference material in validation	16
7.7	Acceptance criteria of targeted validation parameters	16
7.8	Precision	17
7.9	Detection limit	17
7.10	Accuracy	17
7.11	Robustness	18
7.12	Ruggedness	18
8	Use and application of rapid microbial tests	18
8.1	Number and type of samples	18
8.2	Testing environment	18
8.3	Sensitivity	19
8.4	Analytical specificity (microorganism detection)	19
8.5	Comparable test data	19
9	Investigation of positive sterility results	20

10	Training	20
11	Documentation	21
12	Test report	21
	Annex A (informative) Exemplary framework for identifying microbial contamination	22
	Annex B (informative) Risk analysis with cellular therapeutic products related to input materials -- Donor selection	23
	Annex C (informative) Risk analysis with cellular therapeutic products related to input materials -- Cell transformation and expansion	24
	Annex D (informative) Risk analysis with cellular therapeutic products related to input materials -- Packaging storage and administration	26
	Annex E (informative) Risk-based classification for monitoring practices for cellular therapeutic product manufacturing	27
	Annex F (informative) Validation of rapid microbial test methods	28
	Annex G (informative) Microorganisms for validation of rapid microbial test methods	30
	Annex H (informative) Methods for rapid microbial testing	34
	Annex I (informative) Environmental control	41
	Bibliography	42
