ISO 11737-3:2023-06 (E)

Sterilization of health care products - Microbiological methods - Part 3: Bacterial endotoxin testing

Contents

Page

Foreword ..... **v**

Introduction ..... **vi**

1 Scope **1**
1.1 Inclusions 1
1.2 Exclusions 1

2 Normative references **1**

3 Terms and definitions **1**

4 General requirements **7**

5 Selection of products **8**
5.1 General 8
5.2 Selection of product units 8

6 Methods for BET **9**
6.1 General 9
6.2 Consideration of an applicable endotoxin limit 10
6.2.1 Endotoxin limit 10
6.2.2 Calculation of endotoxin limit for the extract solution 10
6.2.3 Maximum valid dilution (MVD) 10
6.3 Critical test parameters 11
6.3.1 Temperature 11
6.3.2 Time 11
6.3.3 pH 11
6.4 Equipment and materials 11
6.5 Reagents 12

7 Method suitability for BET (BET validation) **12**
7.1 General 12
7.2 Product and test method suitability 12
7.2.1 Gel-clot technique 12
7.2.2 Kinetic and end point methods (chromogenic and turbidimetric techniques) 13
7.3 Sample preparation 14
7.3.1 General 14
7.3.2 Solid health care products 14
7.3.3 Aqueous health care products 15
7.3.4 Sample interference 15
7.4 Reagent and analyst qualification 15
7.4.1 Gel-clot technique reagent qualification 15
7.4.2 Kinetic and end point method reagent qualification 15
7.4.3 Analyst qualification 16

8 Routine testing, monitoring and interpretation of data **16**
8.1 Routine testing 16
8.1.1 Gel-clot limit test 16
8.1.2 Gel-clot assay 16
8.1.3 Kinetic and end point methods (chromogenic and turbidimetric) 17
8.2 Monitoring (test frequency) 17
8.3 Interpretation of results 17
8.3.1 General 17

8.3.2 Gel clot methods 18
8.3.3 Kinetic and end point methods 18
8.4 Data analysis 18
8.5 Statistical methods 18
9 Maintenance of the BET method 18
9.1 General 18
9.2 Changes to either the product or manufacturing process, or both 18
9.3 Changes to the BET method 19
10 Alternatives to batch testing 19
10.1 General 19
10.2 Criteria for establishing alternatives to batch testing 19
10.3 Manufacturing process assessment 20
10.3.1 Quality planning of manufacturing processes 20
10.3.2 Process design 20
10.3.3 Process control 20
10.4 Change control 21
10.5 Maintenance of risk assessment 21
Annex A (informative) **Guidance on bacterial endotoxin testing (following the subclauses in this document) 22**
Annex B (informative) **History and background on the bacterial endotoxins test (BET) 42**
Annex C (informative) **Guidance on out of specified limits (OSL) and failure investigation 46**
Annex D (informative) **Guidance on in-process monitoring of manufacturing processes or component testing 50**
Annex E (informative) **Guidance on conducting a risk assessment to support alternatives to batch testing 53**
Annex F (informative) **Typical assignment of responsibilities 58**
