ISO 6273:2024-03 (E)

Assistive products - Accessibility guidelines and requirements to survey the needs of persons with sensory disabilities for assistive products and services

Contents

Page

Foreword ..... **iv**

Introduction ..... **v**

1 Scope **1**

2 Normative references **1**

3 Terms and definitions **1**

4 Accessibility of surveys **5**

4.1 Management of the survey process 5

4.1.1 Accessibility requirements and recommendations 5

4.1.2 Planning of the survey project 5

4.1.3 Documentation of the survey process 5

4.1.4 Design of the data collection instruments and pre-tests 6

4.1.5 Recruitment of participants 6

4.1.6 Problems and complaints management 7

4.2 Types of survey data 7

4.2.1 General 7

4.2.2 Quantitative data 7

4.2.3 Qualitative data 7

5 Data collection **8**

5.1 General 8

5.2 Questionnaires 8

5.2.1 Format of questionnaire 8

5.2.2 Open-ended and closed-ended questions 8

5.3 Interviews and focus groups 9

5.3.1 General 9

5.3.2 Accessibility of interviews 9

5.3.3 Format of interviews 9

5.3.4 Types of interviews 9

5.3.5 Interviewee types 10

6 User needs for assistive products **11**

6.1 General 11

6.2 User needs regarding existing assistive products 11

6.2.1 General 11

6.2.2 Identification of performance deficiencies, problems or potential improvements 11

6.2.3 Usability of existing assistive products 11

6.3 User needs for new assistive products 12

7 Accessibility guidelines for survey with persons with sensory disabilities **12**

7.1 General 12

7.2 Accessibility principles in questionnaire and interview 13

7.2.1 General 13

7.2.2 Perceivable 13

7.2.3 Operable 15

7.2.4 Understandable 16

7.2.5 Robust 17
