| European foreword .....   |   | 5           |
| <b>Annex ZA (informative) Relationship between this European Standard and the General Safety and Performance requirements of Regulation (EU) 2017/745 aimed to be covered</b> ..... |   | <b>6</b>    |
| <b>Annex ZB (informative) Relationship between this European Standard and the General Safety and Performance Requirements of Regulation (EU) 2017/746 aimed to be covered</b> ..... |   | <b>10</b>   |
| Foreword.....   |   | 12          |
| Introduction.....   |   | 14          |
| <b>1</b>  | <b>Scope</b> .....  | <b>17</b>   |
| <b>2</b>  | <b>Normative references</b> .....   | <b>17</b>   |
| <b>3</b>  | <b>Terms and definitions</b> .....  | <b>17</b>   |
| <b>4</b>  | <b>General</b> .....  | <b>24</b>   |
| <b>5</b>  | <b>Principles of aseptic processing</b> .....                             | <b>25</b>   |
|   | 5.1 General.....  | 25          |
|   | 5.2 Use of an aseptic process.....  | 25          |
|   | 5.3 Core elements.....  | 26          |
|   | 5.4 Aseptic processing zones.....   | 27          |
|   | 5.4.1 General.....  | 27          |
|   | 5.4.2 Critical processing zone.....                                       | 27          |
|   | 5.4.3 Direct support zones.....   | 27          |
|   | 5.4.4 Indirect support zones.....   | 28          |
| <b>6</b>  | <b>Process design, development and risk management</b> .....              | <b>28</b>   |
|   | 6.1 General.....  | 28          |
|   | 6.2 Process design.....   | 29          |
|   | 6.3 Risk assessment.....  | 30          |
|   | 6.4 Identification of critical control points and process parameters..... | 30          |
|   | 6.5 Handling and processing.....  | 31          |
|   | 6.6 Environment and air handling.....                                     | 31          |
|   | 6.7 Materials.....  | 32          |
|   | 6.8 Personnel.....  | 32          |
|   | 6.8.1 General.....  | 32          |
|   | 6.8.2 Training.....   | 32          |
|   | 6.8.3 Health.....   | 33          |
|   | 6.8.4 Interventions.....  | 33          |
|   | 6.8.5 Service personnel.....  | 33          |
|   | 6.8.6 Cleanroom clothing systems.....                                     | 33          |
|   | 6.9 Aseptic processing equipment.....                                     | 34          |
|   | 6.9.1 General.....  | 34          |
|   | 6.9.2 Automated processes and robotics.....                               | 35          |
|   | 6.9.3 Single use systems and connecting devices.....                      | 35          |
|   | 6.9.4 Auxiliary equipment and utilities.....                              | 35          |
|   | 6.10 Components.....  | 36          |
|   | 6.11 Product related safety requirements.....                             | 36          |
|   | 6.12 Aseptic final packaging process.....                                 | 36          |
|   | 6.13 Flow management.....   | 36          |
|   | 6.13.1 Containment.....   | 36          |

|          |        |  |           |
|----------|--------|--|-----------|
|          | 6.13.2 | Cross contamination.....                                   | 37        |
|          | 6.13.3 | Item introduction.....                                     | 37        |
|          | 6.13.4 | Egress.....  | 37        |
|          | 6.13.5 | Waste management.....                                      | 37        |
|          | 6.14   | Manufacturing process duration.....                        | 38        |
| <b>7</b> |        | <b>Contamination control strategy (CCS).....</b>           | <b>38</b> |
|          | 7.1    | General.....   | 38        |
|          | 7.2    | Cleaning and disinfection programs.....                    | 38        |
|          | 7.2.1  | General.....   | 38        |
|          | 7.2.2  | Cleaning.....  | 39        |
|          | 7.2.3  | Disinfection.....  | 39        |
|          | 7.2.4  | Equipment used for cleaning and disinfection in APA.....   | 40        |
|          | 7.2.5  | Cleaning process validation.....                           | 40        |
|          | 7.2.6  | Disinfection process validation.....                       | 41        |
|          | 7.2.7  | Cleaning and disinfection of equipment.....                | 41        |
|          | 7.2.8  | Cleaning and disinfection procedures.....                  | 41        |
|          | 7.3    | Sterilization.....   | 42        |
|          | 7.3.1  | General.....   | 42        |
|          | 7.3.2  | Sterilization processes.....                               | 42        |
|          | 7.3.3  | Sterilization equipment.....                               | 42        |
|          | 7.3.4  | Sterilization procedures.....                              | 42        |
|          | 7.3.5  | Post aseptic lethal treatments.....                        | 43        |
|          | 7.3.6  | Endotoxin control.....                                     | 43        |
|          | 7.3.7  | Depyrogenation process.....                                | 43        |
|          | 7.4    | Maintenance of sterility.....                              | 44        |
|          | 7.5    | Maintenance and calibration programs.....                  | 46        |
|          | 7.5.1  | Service personnel.....                                     | 46        |
|          | 7.5.2  | Planned maintenance activities.....                        | 46        |
|          | 7.5.3  | Unplanned maintenance.....                                 | 47        |
|          | 7.5.4  | Calibration of equipment.....                              | 47        |
|          | 7.6    | Environmental monitoring.....                              | 47        |
|          | 7.6.1  | General.....   | 47        |
|          | 7.6.2  | Sampling for non-viable particulate monitoring.....        | 48        |
|          | 7.6.3  | Sampling for microbiological environmental monitoring..... | 48        |
|          | 7.7    | Containment of highly potent or toxic substances.....      | 49        |
| <b>8</b> |        | <b>Demonstration of the effectiveness.....</b>             | <b>49</b> |
|          | 8.1    | Equipment qualification and validation.....                | 49        |
|          | 8.1.1  | General.....   | 49        |
|          | 8.1.2  | User requirements specification.....                       | 49        |
|          | 8.1.3  | Design qualification.....                                  | 50        |
|          | 8.1.4  | Installation qualification (IQ).....                       | 50        |
|          | 8.1.5  | Operational qualification (OQ).....                        | 50        |
|          | 8.1.6  | Performance qualification (PQ).....                        | 34        |
|          | 8.1.7  | Requalification.....                                       | 50        |
|          | 8.2    | Aseptic process validation.....                            | 51        |
|          | 8.2.1  | General.....   | 51        |
|          | 8.2.2  | Establishment and management of interventions.....         | 51        |
|          | 8.2.3  | Process simulation.....                                    | 51        |
|          | 8.2.4  | Initial aseptic qualification.....                         | 54        |
|          | 8.2.5  | Periodic performance requalification.....                  | 54        |
|          | 8.2.6  | Repeat of initial aseptic qualification.....               | 55        |
|          | 8.2.7  | Documentation of process simulations.....                  | 55        |
|          | 8.2.8  | Disposition of filled product.....                         | 56        |
|          | 8.2.9  | Aseptic process lifecycle considerations.....              | 56        |

|                     |   |           |
|---------------------|---|-----------|
| 8.3                 | Maintenance of process .....  | 57        |
| 8.3.1               | General .....   | 57        |
| 8.3.2               | Review of the manufacturing process .....   | 57        |
| 8.3.3               | Changes or developments to the manufacturing process .....                        | 57        |
| <b>9</b>            | <b>Product release</b> .....  | <b>58</b> |
| 9.1                 | General .....   | 58        |
| 9.2                 | Testing for sterility .....   | 58        |
| 9.3                 | Testing for bacterial endotoxins .....  | 58        |
| 9.4                 | Testing for mycoplasma .....  | 59        |
| 9.5                 | Rapid and alternative microbiological methods .....                               | 59        |
| <b>Annex A</b>      | <b>(informative) Aseptic processing — Typical elements</b> .....                  | <b>60</b> |
| <b>Annex B</b>      | <b>(informative) Risk management</b> .....  | <b>61</b> |
| <b>Annex C</b>      | <b>(informative) Typical processing zones</b> .....                               | <b>68</b> |
| <b>Annex D</b>      | <b>(informative) Comparison of classification of cleanrooms and filters</b> ..... | <b>73</b> |
| <b>Annex E</b>      | <b>(informative) Example of an aseptic process flow chart</b> .....               | <b>76</b> |
| <b>Annex F</b>      | <b>(informative) Closed systems and robotics</b> .....                            | <b>77</b> |
| <b>Annex G</b>      | <b>(informative) Sterile cleanroom clothing system qualification</b> .....        | <b>80</b> |
| <b>Annex H</b>      | <b>(informative) Rapid and alternative microbiological methods</b> .....          | <b>84</b> |
| <b>Bibliography</b> | .....   | <b>96</b> |
