ISO 24479:2024-10 (E)

Biotechnology - Cellular morphological analysis - General requirements and considerations for cell morphometry to quantify cell morphological features

Contents

Page

Foreword ..... **v**

Introduction ..... **vi**

1 Scope **1**

2 Normative references **1**

3 Terms and definitions **1**

4 Abbreviations **4**

5 General Concept **5**
5.1 Cell morphometry 5
5.2 Steps for cell morphometry 5

6 Target of interest (TOI) **5**

7 Image capture **6**
7.1 Microscopic observation method 6
7.1.1 General 6
7.1.2 Cell properties to be observed 7
7.1.3 Sample preparation 7
7.2 Microscope system and its settings 9
7.2.1 General 9
7.2.2 Light source 11
7.2.3 Objective lens and condenser lens 11
7.2.4 Components in optical path 11
7.2.5 Image capture device 12
7.2.6 Image data 12
7.2.7 Environmental conditions 12
7.2.8 Observing position 12
7.2.9 Image capturing conditions 13
7.3 Execution of image capture 13
7.3.1 Single image capture 13
7.3.2 Multiple image capture 13

8 Segmentation of the TOI **13**

9 Quantification **14**
9.1 General 14
9.2 Procedure to quantify morphological features of segmented object 14

10 Qualification of Measurement **14**

11 Reporting **15**
11.1 General 15
11.2 Reporting of sample properties and sample preparation 15
11.3 Reporting of the microscopic observation method 15
11.4 Reporting of the image data, image pre-processing, and image analysis for morphometric analysis 16
11.5 Reporting of the morphological features for morphometric analysis 17

Annex A (informative) **Check sheet regarding selection of contrast-enhancing techniques for optical microscopy** **18**

Annex B (informative) **Check sheet regarding selection of microscope system** **20**

Annex C (informative) **List of cell morphological descriptors, definitions and formulae for cell shape, size** **21**

Annex D (informative) **List of cell morphological descriptors, definitions and formulae for cell texture** **29**

Annex E (informative) **Points to consider when acquiring phase-contrast images of cells suitable for image analysis** **34**

Bibliography **43**
