Manufacturers' considerations for in vitro diagnostic medical devices in a public health emergency

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Termsanddefinitions 1

4 General considerations for the design and development process 5
4.1 Safety and performance requirements 5
4.2 Quality management and risk management 6
4.3 Target condition and scientific validity 6
4.4 Assay technology 6
4.5 Intended use and risks and benefits of the device 6
4.6 Analytical performance 7
4.7 Stability 7
4.8 Clinical performance 7

5 General considerations for the risk management process 8
5.1 General 8
5.2 Risk reduction 8

6 Monitoring the device's post-market performance and quality assurance 9
6.1 General 9
6.2 Monitoring post-market performance 9
6.3 Quality assurance 9

7 Implementing a communication process 10
7.1 Establishing a communication process 10
7.2 Manufacturer responsibility 10
