## Manufacturers' considerations for in vitro diagnostic medical devices in a public health emergency

---

<b>Contents</b>		<b>Page</b>
Foreword .....		iv
Introduction .....		v
1	Scope .....	1
2	Normative references .....	1
3	Terms and definitions .....	1
4	General considerations for the design and development process .....	5
4.1	Safety and performance requirements .....	5
4.2	Quality management and risk management .....	6
4.3	Target condition and scientific validity .....	6
4.4	Assay technology .....	6
4.5	Intended use and risks and benefits of the device .....	6
4.6	Analytical performance .....	7
4.7	Stability .....	7
4.8	Clinical performance .....	7
5	General considerations for the risk management process .....	8
5.1	General .....	8
5.2	Risk reduction .....	8
6	Monitoring the device's post-market performance and quality assurance .....	9
6.1	General .....	9
6.2	Monitoring post-market performance .....	9
6.3	Quality assurance .....	9
7	Implementing a communication process .....	10
7.1	Establishing a communication process .....	10
7.2	Manufacturer responsibility .....	10
