Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Terms and definitions 1

4 Descriptions 2

5 Quality and safety requirements and recommendations 2
5.1 General characteristics 2
5.2 Morphological features 2
5.3 Thin-layer chromatography feature 3
5.4 Moisture 3
5.5 Total ash 3
5.6 Acid-insoluble ash 3
5.7 Absorbance 3
5.8 Water-soluble extract 3
5.9 Marker compound(s) 3
5.10 Heavy metals 3
5.11 Pesticide residues 3
5.12 Sulfur dioxide 3
5.13 Aflatoxins 3

6 Sampling 4

7 Test methods 4
7.1 Macroscopic identification 4
7.2 Thin-layer chromatography identification 4
7.3 Determination of moisture 4
7.4 Determination of total ash 4
7.5 Determination of acid-insoluble ash 4
7.6 Determination of absorbance of red pigment 4
7.7 Determination of water-soluble extract 4
7.8 Determination of marker compound(s) 4
7.9 Determination of heavy metals 4
7.10 Determination of pesticide residues 4
7.11 Determination of sulfur dioxide content 4
7.12 Determination of aflatoxins 4

8 Test report 5

9 Packaging, storage and transportation 5

10 Marking and labelling 5

Annex A (informative) Thin-layer chromatography (TLC) identification 6

Annex B (informative) Determination of absorbance of red pigment 7

Annex C (informative) Determination of hydroxysafflor yellow A content 8

Annex D (informative) Determination of kaempferol content 11

Annex E (informative) Reference values of national and regional limits for Carthamus tinctorius flower 14

Bibliography 16
