

DIN EN ISO 19211:2025-11 (E)

Anaesthetic and respiratory equipment - Fire-activated oxygen shut-off devices for use during oxygen therapy (ISO 19211:2024)

Contents	Page
Foreword.....	iv
Introduction.....	v
1 Scope.....	1
2 Normative references.....	1
3 Terms and definitions.....	1
4 General requirements.....	2
5 Materials.....	2
5.1 General.....	2
5.2 Biological assessment of gas pathways.....	2
5.3 Oxygen compatibility.....	2
5.4 Environmental conditions.....	3
6 Design requirements.....	3
6.1 General.....	3
6.2 Specific design requirements.....	3
6.3 Inlet connector.....	3
6.4 Outlet connector.....	3
6.5 Resistance to flow.....	4
6.6 Leakage to atmosphere under maximum static pressure.....	4
6.7 Leakage to atmosphere during normal use conditions.....	4
6.8 Activation and prevention of flow of oxygen.....	5
6.9 Inadvertent disassembly.....	5
7 Requirements for <i>fire activated oxygen shut-off devices</i> supplied sterile.....	5
8 Packaging.....	5
8.1 General.....	5
8.2 Protection during storage and transport.....	5
9 Information supplied by the <i>manufacturer</i>.....	5
9.1 General.....	5
9.2 Instructions for use.....	6
Annex A (informative) Rationale.....	7
Annex B (normative) Test methods.....	9
Annex C (informative) Arrangements of <i>fire activated oxygen shut-off devices</i>.....	12
Annex D (informative) Hazard identification for the purposes of risk assessment.....	13
Bibliography.....	14
