

ISO 20397-3:2025-07 (E)

Biotechnology - Massively parallel sequencing - Part 3: General requirements and guidance for metagenomics

Contents

Page

| | |
|--|-----------|
| Foreword..... | iv |
| Introduction..... | v |
| 1 Scope..... | 1 |
| 2 Normative references..... | 1 |
| 3 Terms and definitions..... | 1 |
| 4 Principle..... | 4 |
| 4.1 General..... | 4 |
| 5 Sampling strategy..... | 5 |
| 5.1 General..... | 5 |
| 5.2 Primary sample type..... | 6 |
| 5.3 Primary sample stabilization and storage..... | 6 |
| 5.4 Primary sample transportation..... | 6 |
| 5.5 DNA/RNA isolation..... | 7 |
| 5.6 DNA/RNA sample quality..... | 7 |
| 6 Nucleic acid library preparation..... | 7 |
| 7 Design and review process including sequencing strategy and assessment..... | 7 |
| 7.1 General..... | 7 |
| 7.2 Short read..... | 7 |
| 7.3 Long read..... | 8 |
| 7.4 Hybrid assembly..... | 8 |
| 7.5 Sample preparation and library construction..... | 8 |
| 7.6 Assessment..... | 8 |
| 8 Database construction..... | 9 |
| 8.1 General..... | 9 |
| 8.2 Public database..... | 9 |
| 8.3 Self-build database..... | 9 |
| 9 Bioinformatics analysis..... | 10 |
| 9.1 General..... | 10 |
| 9.2 Identification list of microorganisms..... | 11 |
| 10 Validation and verification..... | 11 |
| 10.1 General..... | 11 |
| 10.2 In silico sequence control for bioinformatics pipeline evaluation..... | 11 |
| 10.3 Real sample control for pipeline evaluation..... | 11 |
| 11 Evaluation..... | 12 |
| 12 Test report..... | 12 |
| 12.1 General..... | 12 |
| 12.2 Test report content..... | 12 |
| Annex A (informative) Checklist for NA sample quality assessment before library construction..... | 13 |
| Annex B (informative) Methods for sample stabilization and storage..... | 14 |
| Annex C (informative) Bioinformatics pipeline..... | 15 |
| Bibliography..... | 17 |
