

ISO 8472-2:2026-02 (E)

Biotechnology - Data interoperability for stem cell data - Part 2: Key characteristics of stem cell data

Contents

Page

- Foreword..... iv
- Introduction..... v
- 1 Scope..... 1**
- 2 Normative references..... 1**
- 3 Terms and definitions..... 1**
- 4 General key characteristics of stem cell data for data interoperability..... 2**
- 5 Key characteristic of stem cell data..... 3**
 - 5.1 General..... 3
 - 5.2 Cell morphology..... 3
 - 5.3 Cell authentication..... 3
 - 5.4 Cell viability..... 3
 - 5.5 Cell markers..... 3
 - 5.6 Chromosome karyotype..... 4
 - 5.7 Membrane potential or field potential..... 4
 - 5.8 Calcium flux..... 4
 - 5.9 Contractility..... 4
 - 5.10 Genetic stability..... 4
 - 5.11 In vitro differentiation..... 4
 - 5.12 Identify testing..... 4
 - 5.13 Functional testing..... 5
 - 5.14 Pharmacological action..... 5
 - 5.15 Microorganisms..... 5
- 6 Extra information for stem cells..... 5**
- Annex A (informative) Database list example(s)..... 7**
- Bibliography..... 8**
