

DIN EN ISO 18777-1:2026-09 (E)

Transportable liquid oxygen systems for medical use - Part 1: Common requirements and particular requirements for base units (ISO 18777-1:2026)

Contents

Page

Foreword.....	iv
Introduction.....	v
1 Scope.....	1
2 Normative references.....	1
3 Terms and definitions.....	1
4 General requirements.....	2
4.1 Risk management.....	2
4.2 Usability.....	3
4.3 Materials.....	3
4.4 Environmental conditions.....	3
4.4.1 Transport and storage.....	3
4.4.2 Operational.....	4
5 Design requirements.....	4
5.1 Cryogenic vessels.....	4
5.2 Contents level indication.....	4
5.3 <i>Transfilling devices</i> and filling port connectors.....	4
5.4 Interoperability between the <i>base unit</i> and the <i>portable unit</i>	6
5.5 Flow outlets.....	6
5.6 Oxygen temperature at the flow outlet.....	6
5.7 <i>Flow control device</i>	6
5.8 Pressure at the flow outlet.....	6
5.9 <i>Oxygen conserving device</i>	6
5.10 Venting of gaseous oxygen.....	6
5.11 Pressure control.....	7
5.12 Evaporation rate.....	7
5.13 Leakage.....	7
5.14 Excessive temperatures of accessible surfaces.....	7
5.15 Electrical safety.....	7
5.16 Protection of components and controls.....	7
5.17 Stability.....	8
5.18 Battery compartments.....	8
6 Construction requirements.....	8
7 Information to be supplied by the manufacturer.....	8
7.1 General.....	8
7.2 Marking.....	8
7.3 Instructions for use for the intended user.....	9
7.3.1 General information.....	9
7.3.2 Safety information.....	9
7.3.3 Pre use checks.....	9
7.3.4 Filling instructions.....	9
7.3.5 General warning statements.....	10
Annex A (informative) Rationale.....	11
Annex B (Normative) Test Methods.....	13
Annex C (Normative) Opening sequence between the <i>base unit transfilling device</i> and the <i>portable unit</i> filling port connector.....	17
Annex D (informative) Guidance on the requirements in IEC 60601-1 that can be applicable.....	18
Annex E (informative) Hazard identification for risk management assessment.....	21
Bibliography.....	22
