ISO/TR 6203:2026-10 (E)

Health informatics - Personalized digital health - Common factors for frailty assessment

Contents

Page

Foreword v

Introduction vi

1 Scope 1

2 Normative references 1

3 Terms and definitions 1

4 Frailty measurement instruments 1
4.1 General 1
4.2 Fried Frailty Phenotype (FFP) 2
4.2.1 General 2
4.2.2 Strengths 2
4.2.3 Limitations 2
4.2.4 Application 2
4.3 Frailty Index (FI) 2
4.3.1 General 2
4.3.2 Strengths 2
4.3.3 Limitations 2
4.3.4 Application 2
4.4 Edmonton Frail Scale (EFS) 3
4.4.1 General 3
4.4.2 Strengths 3
4.4.3 Limitations 3
4.4.4 Application 3
4.5 Tilburg Frailty Indicator (TFI) 3
4.5.1 General 3
4.5.2 Strengths 3
4.5.3 Limitations 3
4.5.4 Application 3
4.6 Hospital Frailty Risk Score (HFRS) 4
4.6.1 General 4
4.6.2 Strengths 4
4.6.3 Limitations 4
4.6.4 Application 4
4.7 Clinical Frailty Scale (CFS) 4
4.7.1 General 4
4.7.2 Strengths 4
4.7.3 Limitations 4
4.7.4 Application 5
4.8 Comparative summary of frailty measurement instruments 5
4.9 Selection criteria for frailty assessment instruments 5
4.9.1 General 5
4.9.2 Key selection criteria for frailty instruments 5
4.10 The need for frailty prediction models 6

5 Common factors for predicting frailty 6
5.1 General 6
5.2 Physical factors 7

5.2.1 General 7
5.2.2 Muscle weakness 7
5.2.3 Low physical activity 7
5.2.4 Unintentional weight loss 7
5.2.5 Fatigue or exhaustion 7
5.3 Cognitive and psychological health 7
5.3.1 General 7
5.3.2 Cognitive impairment 7

5.3.3 Depression and anxiety 7
5.4 Functional limitations 7
5.4.1 General 7
5.4.2 Mobility and balance 8
5.4.3 Activities of daily living (ADLs) 8
5.5 Social factors 8
5.5.1 General 8
5.5.2 Social isolation 8
5.5.3 Social support 8
5.6 Comorbidities and health deficits 8
5.6.1 General 8
5.6.2 Chronic conditions 8
5.6.3 Accumulation of health deficits 8
5.7 Frailty domains and operationalized factors 8

6 Benefitsandvalueoffrailtyfactors 9
6.1 General 9
6.2 Clinical and patient care value 9
6.3 Research and public health value 10
6.4 System and resource allocation value 10

7 Intelligent frailty measurement system using a minimal data set 10
