Natural latex rubber condoms - Requirements and test methods

Contents

Page

1 Scope 1

2 Normative references 1

3 Terms and definitions 1

4 Quality verification 3

5 Design 3

6 Burst volume and pressure 4

7 Tests for stability and shelf life 5

8 Freedom from holes 6

9 Visible defects 6

10 Package integrity 6

11 Packaging and labelling 7

12 Test report 9

Annexes A Sampling plans intended for assessing compliance of a continuing series of lots of sufficient number to allow the switching rules to be applied 10

B Sampling plans intended for assessing compliance of isolated lots 11

C Determination of total lubricant for condoms in individual containers 12

D Determination of length 14

E Determination of width 16

F Determination of thickness 17

G Determination of bursting volume and pressure 19

H Oven treatment for condoms 22

I Determination of force and elongation at break of test pieces of condoms 23

J Determination of shelf life by real-time stability studies 25

K Guidance on conducting and analysing accelerated ageing studies 27

L Testing for holes 30

M Tests for package integrity 35

N Test report 37

O Calibration of air inflation equipment for determination of burst volume and pressure 38

P Rationale 41
