

DIN CEN/TS 14796:2004-09 (E)

Health informatics_- Data types; German version CEN/TS_14796:2004, text English

Contents

	Page
Foreword	4
1 Scope.....	6
2 Normative references	6
3 Terms and definitions	6
4 Abbreviations	7
5 Introduction to abstract data type definitions.....	8
5.1 Data values and data types	8
5.2 Representation of Data Values	9
5.3 Properties of Data Values.....	9
5.4 Characteristics of the data types.....	10
6 Primitive data types	10
6.1 Introduction	10
6.2 Primitive type set.....	10
6.3 Numeric Types.....	11
6.4 Set<T>	12
6.5 Sequence<T>	13
6.6 Bag<T>	13
6.7 Array<T>.....	13
7 Constructed Data Types.....	13
7.1 DATA_VALUE	14
7.2 Basic data types.....	14
7.3 Introduction	14
7.4 Encapsulated Data	15
7.5 Instance Identifier.....	17
7.6 ISO Object Identifier.....	18
7.7 Universal Resource Identifier	19
7.8 Interval.....	20
8 Textual and Coded data types	21
8.1 Introduction	21
8.2 TEXT	21
8.3 SIMPLE_TEXT	23
8.4 CODED_TEXT	23
8.5 Coded Value.....	23
8.6 Coded with Equivalents.....	24
8.7 Concept Descriptor	25
8.8 Concept Role	25
8.9 Coded Simple Value Abstract Class	26
9 Quantity Types	26
9.1 UML representation	26
9.2 QUANTITY	27
9.3 Ordinal.....	27
9.4 Physical Quantity	28
9.5 DURATION	28
9.6 Quantity Ratio.....	29
9.7 QuantityRange.....	30
10 Time-RelatedTypes	30
10.1 UML representation	30
10.2 Date.....	31
10.3 Time point	32

10.4	Interval of Time	34
10.5	Periodic Interval of Time	34
10.6	Event Related Periodic Interval of Time	36
Annex A	(normative) Null Flavors	37
A.1	Introduction	37
A.2	Null flavor structure	38
Annex B	(normative) Other CS-defined code lists	39

List of Figures

Figure 1	— Packages	8
Figure 2	— UML Representation of Primitive data types	11
Figure 3	— UML Representation of Basic data types	15
Figure 4	— UML Representation of Text data types	22
Figure 5	— UML Representation of Quantity data types	26
Figure 6	— UML Representation of Time-related data types	30

List of Tables

Table 1	— Names and formats of numeric data types	11
Table 2	— Content of 32-bit floating point bit positions	12
Table 3	— Content of 64-bit floating point bit positions	12
Table 4	— Attributes of encapsulated data (ED)	16
Table 5	— Attributes of Instance Identifier (II)	18
Table 6	— Attributes of the OID data type	18
Table 7	— URI schemes	19
Table 8	— Attributes of the URI data type	20
Table 9	— Attributes of Interval	21
Table 10	— Attributes of the TEXT data type	22
Table 11	— Attributes of the CODED_TEXT data type	23
Table 12	— Attributes of the Coded Value (CV) data type	24
Table 13	— Attributes of the Coded with Equivalentents (CE) data type	24
Table 14	— Attributes of Concept Descriptor (CD) data type	25
Table 15	— Attributes of Concept Role (CR) data type	25
Table 16	— Attributes of Ordinal data type	27
Table 17	— Attributes of Physical Quantity data type	28
Table 18	— Attributes of Physical Quantity data type	29
Table 19	— Attributes of Quantity Ratio	29
Table 20	— Attributes of Quantity Range	30
Table 21	— Attributes of Date	31
Table 22	— Attributes of TS	32
Table 23	— Attributes of Interval of Time	34
Table 24	— Attributes of Periodic Interval of Time	35
Table 25	— Attributes of Event Related Periodic Interval of Time	36
Table A.1	— Null Flavor values	38
Table B.1	— MIME media types	39
Table B.2	— Character set codes as defined by IANA	40
Table B.3	— Compression Algorithms	41
