

ISO/TS 18835:2004-07 (E)

Inhalational anaesthesia systems - Draw-over vaporizers and associated equipment

Contents		Page
Foreword		iv
Introduction		v
1	Scope	1
2	Normative references	1
3	Terms and definitions	1
4	Air/oxygen reservoir	2
4.1	Connections	2
4.2	Draw-over vaporizer	2
4.3	Inflating bellows device	3
4.4	Anaesthetic patient valve	3
4.5	Connecting tubes	3
5	Construction	4
5.1	General	4
5.2	Draw-over vaporizer	4
5.3	Air/oxygen reservoir	5
5.4	Inflating bellows device	5
5.5	Anaesthetic patient valve dismantling and reassembly	5
6	Performance	5
6.1	Draw-over vaporizer	5
6.2	Air/oxygen reservoir	6
6.3	Inflating bellows device	6
6.4	Anaesthetic patient valve	6
6.5	Complete system -- Resistance to spontaneous inspiration and expiration	7
7	Arrangement of components in draw-over anaesthetic system	7
7.1	Oxygen inlet	7
7.2	Vaporizer	7
8	Marking of components	7
8.1	General	7
8.2	Marking of breathing-system attachments	7
8.3	Marking of draw-over vaporizer	7
8.4	Marking of air/oxygen reservoir	8
8.5	Marking of inflating bellows device	8
8.6	Marking of packages	8
9	Information to be provided with equipment	9
9.1	General	9
9.2	Draw-over vaporizer	9
9.3	Inflating bellows	9
9.4	Anaesthetic patient valve	10
Annex A (normative)	Test methods	11

Annex B (informative) Diagrams of assemblies of components used in draw-over anaesthetic systems	14
Annex C (informative) Rationale	17
Bibliography	19
