DIN EN 13609-1:2005-09 (E)

Health Informatics - Messages for maintenance of supporting information in healthcare systems - Part 1: Updating of coding schemes; English version EN 13609-1:2005

Contents

Foreword 4
Introduction 5
1 Scope 6
2 Normative references 7
3 Terms and definitions 7
4 Requirements 9
5 Communication roles and supported services 10
5.1 General 10
5.2 Communication roles 10
5.3 Communication roles, services and General Message Description 10
6 General Message Description 11
6.1 Introduction 11
6.2 The modelling approach 11
6.3 The Healthcare Agent in Context Sub-System 11
6.4 Update Coding Scheme Message 12
6.4.1 Purpose of Message 12
6.4.2 Scope of Message 12
6.4.3 Hierarchical General Message Description 13
7 Domain Information Model 13
7.1 Introduction 13
7.2 Top Level Model 14
7.2.1 Introduction 14
7.3 Communicating Parties subsystem 15
7.3.1 General Description 15
7.3.2 Coding Scheme Provider 15
7.3.3 Coding Scheme Information Receiver 15
7.4 Healthcare Agent subsystem 16
7.4.1 General Description 16
7.4.2 Healthcare Agent 17
7.4.3 Healthcare Agent in Context 17
7.4.4 Healthcare Agent Relationship 18
7.4.5 Healthcare Organisation 18
7.4.6 Healthcare Party 19
7.4.7 Healthcare Person 19
7.5 Coding Scheme Update subsystem 20
7.5.1 General Description 20

7.5.2 Update Coding Scheme Message **21**
7.5.3 Coding Scheme Information **21**
7.5.4 Coding Scheme Originator **22**
7.6 Coding Scheme Update Operation subsystem **22**
7.6.1 General Description **22**
7.6.2 Code Value Entry **23**
7.6.3 Aggregate Code Value **24**
7.6.4 Associated Code Value **25**
7.6.5 Code Value Group **25**
7.6.6 Code Value Validation **26**
7.6.7 Code Meaning **27**
7.6.8 Mapping Term Entry **28**
7.7 Common Sub-Classes **29**
7.7.1 Address **29**
7.7.2 Associated Code **29**
7.7.3 Coding scheme details **30**
7.7.4 Person name details **30**
7.7.5 Structured address **31**
7.7.6 Structured person name **31**
7.7.7 Structured telecommunication number **32**
7.7.8 Telecommunication **32**
7.7.9 Unstructured address **33**
7.7.10 Validity dates **33**
7.8 Other Simple Data Types **33**
7.8.1 Introduction **33**
7.8.2 CS: Coded Simple Value **34**
7.8.3 CV: Coded Value **34**
7.8.4 II: Instance Identifier **35**
Annex A (informative) Unified Modeling Language Notation used within this document **36**
A.1 Model Components 36
A.2 Packages 36
A.3 Classes 36
A.4 Types of relationships between classes 37
Annex B (informative) Scenarios and Message Explanation **39**
B.1 The transfer of a set of EDIFACT codes for use in a Laboratory Request Message. 39
B.2 Implementation of the IFCC/IUPAC coding scheme 40
Bibliography **42**
