Foreword 2

Introduction 4

1 Scope 5

2 Normative references 5

3 Terms and definitions 6

4 Symbols 8

5 General requirements 8
5.1 Safety 8
5.2 Alternative construction 8
5.3 Materials 8
5.4 Design requirements 9
5.5 Constructional requirements 16

6 Test methods 17
6.1 Conditions 17
6.2 Test methods for outlet pressure 18
6.3 Test method for pressure-relief valve 19
6.4 Test methods for leakage 19
6.5 Test method for mechanical strength 20
6.6 Test method for resistance to ignition 21
6.7 Test method for accuracy of flow of pressure regulators integrated with cylinder valves fitted with flowmeters or flowgauges 24
6.8 Test method for the stability of flow of pressure regulators integrated with cylinder valves fitted with flowmeters or flowgauges 24
6.9 Test method for stability and accuracy of flow of pressure regulators integrated with cylinder valves fitted with fixed orifices 24
6.10 Test method for flow setting and loosening torques 24
6.11 Drop test 25
6.12 Impact test 25
6.13 Test method for means of gas shut-off 26
6.14 Test method for non-return valve of filling port 26
6.15 Test method for durability of markings and colour coding 26

7 Marking, colour coding, packaging 26
7.1 Marking 26
7.2 Colour coding 27
7.3 Packaging 27

8 * Information to be supplied by the manufacturer 28

Annex A (informative) Examples of pressure regulators integrated with cylinder valves 30

Annex B (normative) Rationale 33

Annex C (informative) Reported regional and national deviations of colour coding and nomenclature for medical gases 35

Bibliography 37

Annex ZA (informative) Relationship between this European Standard and the Essential Requirements of EU Directive 93/42/EEC Medical Devices 38
