| Foreword .....     |   | 5           |
| Introduction ..... |   | 6           |
| 1                  | R) Scope .....  | 7           |
| 2                  | Normative references .....  | 7           |
| 3                  | Terms and definitions .....   | 9           |
| 4                  | General requirements and general requirements for test .....              | 10          |
| 4.1                | Modifications to Clause 3 of EN 60601-1:1990 .....                        | 10          |
| 4.2                | Clause 4 of EN 60601-1:1990 .....   | 10          |
| 4.3                | Alternative type-test methods .....                                       | 11          |
| 5                  | Classification .....  | 11          |
| 6                  | Identification, marking and documents .....                               | 11          |
| 6.1                | Marking on the outside of equipment or equipment parts .....              | 11          |
| 6.3                | Marking of controls and instruments .....                                 | 12          |
| 6.4                | Symbols .....   | 12          |
| 6.8.2              | Instructions for use .....  | 12          |
| 6.8.3              | Technical description .....   | 14          |
| 7                  | Power input .....   | 14          |
| 8                  | Basic safety categories .....   | 14          |
| 9                  | Removable protective means .....  | 14          |
| 10                 | Environmental conditions .....  | 15          |
| 11                 | Not used .....  | 15          |
| 12                 | Not used .....  | 15          |
| 13                 | General .....   | 15          |
| 14                 | Requirements related to classification .....                              | 15          |
| 15                 | Limitation of voltage and/or energy .....                                 | 15          |
| 16                 | Enclosures and protective covers .....                                    | 15          |
| 17                 | Separation .....  | 15          |
| 18                 | Protective earthing, functional earthing and potential equalization ..... | 15          |
| 19                 | Continuous leakage currents and patient auxiliary currents .....          | 15          |
| 20                 | Dielectric strength .....   | 16          |
