DIN EN 16212:2012-11 (E)

Energy efficiency and savings calculation - Top-down and Bottom-up methods

Contents

Page

Foreword 4

Introduction 5

1 Scope 6

2 Normative references 6

3 Terms and definitions 6

4 Characteristics of top-down and bottom-up methods 11
4.1 Characteristics 11
4.2 Energy efficiency improvement measure 12
4.3 Type of energy savings 13
4.3.1 Total, autonomous and policy induced savings 13
4.3.2 Baseline and additional savings 15
4.4 Type of data used 16
4.5 System boundaries 16

5 Top-down saving calculations 17
5.1 Energy efficiency indicators 17
5.1.1 General 17
5.1.2 Structure effects and disaggregation 17
5.1.3 Indicator choice and savings definition 18
5.2 General calculation of top-down energy savings 18
5.2.1 Calculation approach 18
5.2.2 Definition of indicator types 18
5.2.3 Calculation of indicator values 19
5.2.4 Calculation of energy savings per indicator 21
5.3 Other issues in the calculation of top-down savings 23
5.3.1 General 23
5.3.2 Calculation alternatives 23
5.3.3 Energy consumption units 24
5.3.4 Miscellaneous 25

6 Bottom-up saving calculations 25
6.1 Elaboration on the object of assessment 25
6.1.1 Elementary unit of action and unitary energy savings 25
6.1.2 Baseline options for end-use actions 26
6.1.3 Saving types from bottom-up calculations 27
6.2 General calculation of bottom-up energy savings 27
6.2.1 Calculation approach 27
6.2.2 Step 1: Calculation of unitary gross annual energy savings 29
6.2.3 Step 2: Calculation of total gross annual energy savings 34
6.2.4 Step 3: Calculation of total annual energy savings 35
6.2.5 Step 4: Calculation of remaining energy savings for target year 37
6.2.6 Calculation of overall bottom-up energy savings, taking into account overlap 38

Annex A (informative) Examples of energy efficiency indicators 40

A.1 Introduction 40
A.2 Sectors and indicators 40

A.2.1 Sectors covered 40
A.2.2 Choice of indicators on energy savings 40
A.3 Indicators for the residential sector 41
A.3.1 General 41
A.3.2 Space heating 42
A.3.3 Water heating 43
A.3.4 Large appliances 43
A.3.5 Lighting and other appliances 43
A.3.6 Total electricity consumption 43
A.3.7 Total non-electricity consumption 43
A.4 Indicators for the service sector 44
A.4.1 General 44
A.4.2 Total energy consumption 44
A.4.3 Total electricity consumption 45
A.4.4 Total non-electricity consumption 45
A.4.5 Fuels and delivered heat for space heating 45
A.4.6 Electricity for lighting or air-conditioning 45
A.4.7 Electricity for ICT and other equipment 45
A.5 Indicators for the transportation sector 45
A.5.1 General 45
A.5.2 Fuel use in cars 46
A.5.3 Fuel use in road freight transport 47
A.5.4 Energy use for other modes 47
A.6 Indicators for the Industry sector 47
A.6.1 General 47
A.6.2 Energy-intensive industry 48
A.6.3 Other industrial branches 48

Annex B (informative) Level of detail and data handling in bottom up calculations 49

B.1 Levels of detail in savings calculations 49
B.2 Harmonisation and data handling 50

Annex C (informative) Bottom up application for buildings; boiler replacement 52

C.1 Introduction 52
C.2 Potential examples of calculations 53
C.3 Example for category 2: Replacement of heating supply equipment in residential and tertiary buildings 54
C.3.1 Step 1: calculation of unitary gross annual energy savings 54
C.3.2 Step 2: total gross annual energy savings 57
C.3.3 Step 3: total annual energy savings 57
C.3.4 Step 4: total remaining energy savings for target year 58
