

DIN EN 16212:2012-11 (E)

Energy efficiency and savings calculation - Top-down and Bottom-up methods

Contents		Page
Foreword		4
Introduction		5
1	Scope	6
2	Normative references	6
3	Terms and definitions	6
4	Characteristics of top-down and bottom-up methods	11
4.1	Characteristics	11
4.2	Energy efficiency improvement measure	12
4.3	Type of energy savings	13
4.3.1	Total, autonomous and policy induced savings	13
4.3.2	Baseline and additional savings	15
4.4	Type of data used	16
4.5	System boundaries	16
5	Top-down saving calculations	17
5.1	Energy efficiency indicators	17
5.1.1	General	17
5.1.2	Structure effects and disaggregation	17
5.1.3	Indicator choice and savings definition	18
5.2	General calculation of top-down energy savings	18
5.2.1	Calculation approach	18
5.2.2	Definition of indicator types	18
5.2.3	Calculation of indicator values	19
5.2.4	Calculation of energy savings per indicator	21
5.3	Other issues in the calculation of top-down savings	23
5.3.1	General	23
5.3.2	Calculation alternatives	23
5.3.3	Energy consumption units	24
5.3.4	Miscellaneous	25
6	Bottom-up saving calculations	25
6.1	Elaboration on the object of assessment	25
6.1.1	Elementary unit of action and unitary energy savings	25
6.1.2	Baseline options for end-use actions	26
6.1.3	Saving types from bottom-up calculations	27
6.2	General calculation of bottom-up energy savings	27
6.2.1	Calculation approach	27
6.2.2	Step 1: Calculation of unitary gross annual energy savings	29
6.2.3	Step 2: Calculation of total gross annual energy savings	34
6.2.4	Step 3: Calculation of total annual energy savings	35
6.2.5	Step 4: Calculation of remaining energy savings for target year	37
6.2.6	Calculation of overall bottom-up energy savings, taking into account overlap	38
Annex A (informative)	Examples of energy efficiency indicators	40
A.1	Introduction	40
A.2	Sectors and indicators	40

A.2.1	Sectors covered	40
A.2.2	Choice of indicators on energy savings	40
A.3	Indicators for the residential sector	41
A.3.1	General	41
A.3.2	Space heating	42
A.3.3	Water heating	43
A.3.4	Large appliances	43
A.3.5	Lighting and other appliances	43
A.3.6	Total electricity consumption	43
A.3.7	Total non-electricity consumption	43
A.4	Indicators for the service sector	44
A.4.1	General	44
A.4.2	Total energy consumption	44
A.4.3	Total electricity consumption	45
A.4.4	Total non-electricity consumption	45
A.4.5	Fuels and delivered heat for space heating	45
A.4.6	Electricity for lighting or air-conditioning	45
A.4.7	Electricity for ICT and other equipment	45
A.5	Indicators for the transportation sector	45
A.5.1	General	45
A.5.2	Fuel use in cars	46
A.5.3	Fuel use in road freight transport	47
A.5.4	Energy use for other modes	47
A.6	Indicators for the Industry sector	47
A.6.1	General	47
A.6.2	Energy-intensive industry	48
A.6.3	Other industrial branches	48
Annex B (informative) Level of detail and data handling in bottom up calculations		49
B.1	Levels of detail in savings calculations	49
B.2	Harmonisation and data handling	50
Annex C (informative) Bottom up application for buildings; boiler replacement		52
C.1	Introduction	52
C.2	Potential examples of calculations	53
C.3	Example for category 2: Replacement of heating supply equipment in residential and tertiary buildings	54
C.3.1	Step 1: calculation of unitary gross annual energy savings	54
C.3.2	Step 2: total gross annual energy savings	57
C.3.3	Step 3: total annual energy savings	57
C.3.4	Step 4: total remaining energy savings for target year	58
Bibliography		59
