DIN EN 16325:2013-05 (E)

Guarantees of Origin related to energy - Guarantees of Origin for Electricity

Contents

Page

Foreword 4

0 Introduction 5
0.1 General 5
0.2 Experiences of the Association of Issuing Bodies (AIB), Description of existing voluntary system (EECS) 5
0.2.1 Association of Issuing Bodies (AIB) 5
0.2.2 The EECS Rules 5
0.2.3 Registration of production devices 6
0.2.4 Issuing of EECS Certificates 6
0.2.5 Use of EECS Certificates 6
0.2.6 Life cycle 6

1 Scope 7

2 Normative references 7

3 Terms and definitions 7

4 Main objectives 12

5 Registration of Competent Bodies and their agents 13
5.1 Appointing authority for Competent Bodies 13
5.2 Characteristics of Competent Bodies 13
5.2.1 General 13
5.2.2 Responsibilities 13
5.2.3 Discretionary powers 14
5.2.4 Limitations of Competent Bodies owning GOs 15
5.2.5 Confidentiality 15
5.3 Criteria for qualification of Competent Bodies 15
5.4 Types of agent 15
5.5 Criteria for qualification of agents 16
5.6 Obligations of Competent Bodies 16
5.6.1 General 16
5.6.2 Verification 16

6 Registration of EGIs and Account Holders 17
6.1 Application procedure for EGIs 17
6.1.1 General 17
6.1.2 Application information 17
6.1.3 Meters 18
6.2 Application procedure for Account Holders 18
6.3 Obligations of Registrants 18
6.4 Revision of Registration Databases 18

7 Issuing and content of a GO 19
7.1 Format of the GO 19
7.2 The Issuing process 20
7.3 Declaration of Consumption and Calculation of Output 20
7.3.1 General 20
7.3.2 Consumption Declaration 21
7.3.3 Calculation of Output 21

7.4 CO2 emissions and nuclear waste 21
7.5 Special provisions for High-Efficiency Cogeneration Electrical Energy 22
7.5.1 Amount of High-Efficiency Cogeneration Electrical Energy Generation produced by an EGI 22
7.5.2 GO Issued for Electrical Energy which has been found to be High-Efficiency Cogeneration Electrical Energy 22

8 Transferring of GOs 22
8.1 General 22
8.2 The Transfer process 22
8.3 Import/export from Registration Databases 23
8.3.1 Receipt of request 23
8.3.2 Rejection of request 23
8.3.3 Restrictions of exports 24
8.3.4 Restrictions of imports 24

9 Correction of errors 24
9.1.1 Errors during issuing 24
9.1.2 Issuing during transfering 24

10 End of the life of a GO 24
10.1 General 24
10.2 Cancellation 25
10.2.1 Cancellation procedure 25
10.2.2 Requesting and Producing a Cancellation Statement 26
10.3 Withdrawal 26
10.4 Expiry 27

11 Measurement and calculation methods 27
11.1 Metering 27
11.1.1 General metering principle 27
11.1.2 Calculation of Nett Electrical Energy 27
11.1.3 Relevant perimeter 30

12 Auditing 30
12.1 Assessment of the National GO Scheme 30
12.2 Auditing of EGIs 30
12.3 Operational practice 31

Annex A (normative) Fuel (or heat source) codes 32

Annex B (normative) Technology codes 36

Annex C (normative) Coding structures 38

C.1 Introduction 38
C.2 Coding of Registration Databases 38
C.3 Coding of certificates 38
C.4 Coding of Electricity Generation Installations 39
C.5 Coding of Account Holder Account IDs 40
C.6 Coding of Technologies 41

Annex D (normative) Geographical coordinates 42

Annex E (normative) Cogeneration GO codes Uses of Heat 44

Annex F (normative) Relevant perimeter 45

F.1 Hydraulic continuity principle 45
F.1.1 General 45
F.1.2 Extended hydraulic continuity principle 45
F.2 Smoothing of Electricity generation 46

F.3 Electricity storage and conversion 46
F.4 Alternative measures for a hydraulic plant 46
F.4.1 Certain flow 46
F.4.2 Non-energy-based hydraulic systems 47

Bibliography 48
