

ISO 17742:2015-08 (E)

Energy efficiency and savings calculation for countries, regions and cities

Contents

Page

Foreword	v
Introduction	vi
1 Scope	1
2 Terms and definitions	1
3 Savings to be calculated	7
3.1 General	7
3.2 Types of savings to be calculated	7
3.2.1 Energy savings as part of energy consumption development	7
3.2.2 Contributions to change of various types of energy savings	9
3.2.3 Savings types for different cases	10
3.3 Methods, applications, and calculated savings	11
3.3.1 Indicator-based calculation method	11
3.3.2 Hidden structure effects in the indicator-based method	12
3.3.3 Measure-based calculation method	12
3.3.4 Energy baseline and additional savings in the measure-based method	13
3.3.5 Aggregated results of indicator-based and measure-based methods	13
3.3.6 Demarcation and integration of indicator-based and measure-based methods	14
3.3.7 Incorporation of other policies that affect energy consumption	14
4 Indicator-based savings calculations	15
4.1 Indicators and calculation of savings	15
4.1.1 Energy efficiency indicators	15
4.1.2 Structure effects and disaggregation	15
4.1.3 Indicator choice and savings definition	16
4.2 General calculation of indicator-based energy savings	16
4.2.1 Calculation approach	16
4.2.2 Step 1: Choice of indicator types	17
4.2.3 Step 2: Calculation of indicator values	17
4.2.4 Step 3: Calculation of energy savings per indicator	20
4.3 Computational issues in the calculation of indicator-based savings	21
4.3.1 General	21
4.3.2 Variants of the calculation method	22
4.3.3 Energy consumption units	23
4.3.4 Overall indicator-based energy savings	24
4.4 Reliability of saving figures	24
4.4.1 Indicators resulting in negative savings	24
4.4.2 The quality of indicator-based energy-saving figures	24
5 Measure-based savings calculations	26
5.1 Measures and calculation of savings	26
5.1.1 Elementary unit of action and unitary energy savings	26
5.1.2 Energy baseline options for end-user actions	27
5.1.3 Savings types from measure-based calculations	28
5.2 General calculation of measure-based energy savings	29
5.2.1 Calculation approach	29
5.2.2 Step 1: Calculation of unitary gross annual energy savings	31
5.2.3 Step 2: Calculation of total gross annual energy savings	36
5.2.4 Step 3: Calculation of total (net) annual energy savings	38

5.2.5	Step 4: Calculation of remaining energy savings for the calculation year	40
5.2.6	Calculation of overall measure-based energy savings, taken into account overlap	40
5.3	Reliability of calculated savings	41
Annex A (informative) Examples of energy efficiency indicators		43
Annex B (informative) Level of detail and data handling in measure-based calculations		51
Bibliography		53
