DIN EN 16640:2017-08 (E)

Bio-based products - Bio-based carbon content - Determination of the bio-based carbon content using the radiocarbon method

Contents

Page

European foreword 4

Introduction 5

1 Scope 6

2 Normative references 6

3 Terms and definitions 6

4 Symbols and abbreviations 7

5 Principle 8

Table 1 -- Advantages and disadvantages of the methods 8

6 Determination of the 14C content 9
6.1 General 9
6.2 Principle 9
6.3 Sampling 9
6.4 Procedure for the conversion of the carbon present in the sample to a suitable sample for 14C determination 9
6.5 Measurements 9

7 Calculation of the bio-based carbon content 10
7.1 General 10
7.2 Reference value for 100 % bio-based carbon 10

Table 2 -- Typical values for biomass fractions 11
7.3 Calculation method 11
7.3.1 Calculation of the bio-based carbon content by dry mass xB 11
7.3.2 Calculation of the bio-based carbon content xTCB as a fraction of TC 12
7.3.3 Examples 12
7.3.4 Examples of calculations xTCB 13

8 Performance characteristics 13

9 Test report 13

Annex A (informative) Procedures for sampling of products 15

A.1 General 15

Table A.1. -- Sampling procedures 15

Annex B (normative) Procedure for the conversion of the carbon present in the sample to a suitable sample for 14C determination 16

B.1 General 16
B.2 Sample preparation 16

Table B.1-- Sample preparations 16
B.3 Preparation for 14C measurement 16
B.3.1 General 16
B.3.2 Reagents and materials 17
B.4 Combustion of the sample 17
B.4.1 Combustion of the sample in a calorimetric bomb 17
B.4.2 Combustion of the sample in a tube furnace or a combustion apparatus 18
B.4.3 Direct LSC measurement on the product 19
B.5 Standardization of LSC and BI measurement results 19
B.6 Standardization of AMS measurement results 20
B.7 Symbols and abbreviations 20

Annex C (normative) Method A - Liquid scintillation-counter method (LSC) 21

C.1 General 21
C.2 Principle 21
C.3 Reagents and materials 21
C.4 Apparatus 21
C.5 Procedure 22
C.5.1 General 22
C.5.2 Benzene conversion 22
C.5.3 Direct absorption of the CO2 in a carbamate solution 22
C.5.4 Measurement 22
C.5.5 Blank correction 23
C.6 Calculation of the results 23

Annex D (informative) Method C - Beta-ionization (BI) 24

D.1 General 24
D.2 Principle 24
D.3 Reagents and materials 24
D.4 Apparatus 25
D.5 Procedure 25
D.6 Calculation of the results 26

Annex E (normative) Method B - Accelerator Mass Spectrometry (AMS) 27

E.1 General 27
E.2 Principle 25
E.3 Reagents and materials 27
E.4 Apparatus 27
E.5 Procedure 27
E.6 Calculation of the results 28

Annex F (informative) Performance characteristics 29

Table F.1 -- description of sample types 29

Table F.2 -- Performance data for 14C methods 30
