DIN EN 45552:2020-05 (E)

General method for the assessment of the durability of energy-related products

Contents

Page

European foreword 4

Introduction 5

1 Scope 6

2 Normative references 6

3 Terms and definitions 6
3.1 General definitions 6
3.1.1 Terms related to reliability and durability 6
3.1.2 Terms related to functions 7
3.1.3 Activities related to use 8
3.1.4 Other terms 9
3.2 Abbreviations 9

4 Concept and process overview 10
4.1 Concept 10
4.1.1 General 10
4.1.2 Difference between reliability and durability 11
4.1.3 Concepts of functional analysis, primary, secondary and tertiary functions 11
4.1.4 Concepts of limiting event and limiting state 12
4.2 Process overview and guidance 12

5 Definition of the Product 13
5.1 Functional analysis 13
5.2 Environmental and operating conditions 14
5.3 Additional information 14

6 Reliability 14
6.1 General considerations 14
6.2 Reliability analysis 15
6.3 Reliability assessment methods 15

7 Durability 16
7.1 General considerations 16
7.2 Durability analysis 16
7.3 Durability assessment methods 17

8 Documenting the assessment of reliability and durability 17
8.1 General 17
8.2 Elements of the assessment 17
8.3 Documentation 18

Annex A(informative) Additional details on durability and reliability analysis 19

A.1 Environmental and operating conditions 19
A.2 Stress analysis 20
A.3 Damage modelling 21
A.4 Acceleration factors (AF) 21

Annex B(informative) Additional details on testing development 25

B.1 Stress modelling 25
B.2 Accelerated tests 25

Annex C(informative) Maintenance and repair considerations for an increased reliability and durability 28

C.1 General 28
C.2 Wear-out parts and spare parts considerations 29

Annex D(informative) Additional details on limiting event and limiting state 31
