DIN EN 45557:2020-09 (E)

General method for assessing the proportion of recycled material content in energy-related products

Contents

Page

European foreword 3

Introduction 4

1 Scope 5

2 Normative references 5

3 Terms and definitions 5
3.1 Definitions 5
3.1.1 Definitions related to materials 5
3.1.2 Other definitions 6
3.2 Abbreviations 6

4 General assessment procedure 7

5 Description of material composition of ErPs 7
5.1 Scope of the assessment 7
5.2 Material declaration clustering and unspecified materials 8
5.3 Distinction between pre-consumer material and post-consumer material 8
5.3.1 General 8
5.3.2 Pre-consumer material 8
5.3.3 Post-consumer material 10

6 Traceability 12

7 Calculation of recycled materials content 12
7.1 General considerations 12
7.2 Verification and mass balance process for parts or ErPs 12
7.3 General method for recycled materials content calculation for parts or ErPs 14

8 Reporting recycled materials content aspects 15
8.1 General 15
8.2 Elements of the assessment report 15

Annex A(normative) Additional guidance for materials 16

Annex B(informative) Example for the calculation of recycled materials content in an ErP 22
