Smart community infrastructures - Smart transportation for newly developing areas

Contents		Page
Foreword		iv
Introduction		v
1	Scope	1
2	Normative references	1
3	Terms and definitions	1
4	Concept of smart transportation for newly developing areas	1
4.1	General	1
4.2	Transportation modes for newly developing areas	2
4.2.1	General	2
4.2.2	Transportation modes applicable inside newly developing areas	2
4.2.3	Transportation modes applied between a newly developing area and the outside region	3
5	Adoption of smart transportation for newly developing areas	3
5.1	General	3
5.2	Conditions for transportation mode selection	3
5.2.1	General	3
5.2.2	Transportation capacity	3
5.2.3	Service frequency	4
5.2.4	Stop/station interval	4
5.2.5	Geographical applicability	4
5.2.6	Running performance	4
5.2.7	Exclusive tracks and/or street lanes	4
5.2.8	Promotion of environmentally friendly vehicles and life-cycle performance	4
5.2.9	Coach convenience and safety	4
5.2.10	Town value and attractiveness	4
5.2.11	Emergency measures	5
5.2.12	Energy saving	5
5.2.13	Driverless operation applicability	5
5.2.14	On-time operation	5
5.2.15	Flexibility in track arrangements	5
5.3	Installation of smart transportation	5
6	Sustainability in quality of smart transportation for newly developing areas	5
6.1	General	5
6.2	Parameters to be observed	5
6.3	Re-optimization of smart transportation conditions	6
Annex A (informative) Transportation modes used in existing newly developing areas		7
