

# ISO 14009:2020 (E)

## Environmental management systems — Guidelines for incorporating material circulation in design and development

---

### Contents

	Foreword
	Introduction
1	Scope
2	Normative references
3	Terms and definitions
3.1	Terms related to organization and leadership
3.2	Terms related to planning
3.3	Terms related to support and operation
3.4	Terms related to performance evaluation and improvement
4	Context of the organization
4.1	Understanding the organization and its context
4.2	Understanding the needs and expectations of interested parties
4.3	Determining the scope of the environmental management system
4.4	Environmental management system
5	Leadership
5.1	Leadership and commitment
5.1.1	General
5.1.2	Considerations when establishing material circulation strategy
5.1.3	Tasks to introduce material circulation strategy within an organization
5.2	Environmental policy
5.3	Organizational roles, responsibilities and authorities
6	Planning
6.1	Actions to address risks and opportunities
6.1.1	General
6.1.2	Environmental aspects from the material efficiency perspective
6.1.3	Compliance obligations
6.1.4	Planning action
6.2	Environmental objectives and planning to achieve them
6.2.1	Material efficiency objectives as part of the environmental objectives
6.2.2	Planning actions to achieve the material efficiency objectives
6.2.2.1	General
6.2.2.2	Identifying circular readiness status
6.2.2.3	Establishing material circulation strategies
6.2.2.4	Planning design strategies for material circulation
6.2.2.5	Planning actions
7	Support
7.1	Resources
7.2	Competence
7.3	Awareness
7.4	Communication
7.5	Documented information
7.5.1	General
7.5.2	Creating and updating
7.5.3	Control of documented information

- 8**            **Operation**
    - 8.1**            **Operational planning and control**
      - 8.1.1**            **General**
      - 8.1.2**            **Creating material circulation solutions**
      - 8.1.3**            **Design considerations for material circulation**
        - 8.1.3.1**            **Choosing materials that can be more easily recycled**
        - 8.1.3.2**            **Selecting materials that contribute to the extension of the lifetime of the product**
        - 8.1.3.3**            **Reduce/avoid/eliminate materials that are hazardous or have negative impact to recycling**
        - 8.1.3.4**            **Reduce quantity of material inputs including CRMs**
        - 8.1.3.5**            **Maximize recycled content**
        - 8.1.3.6**            **Extend lifetime of a product by proper maintenance and servicing**
        - 8.1.3.7**            **Improve the ability of a product or parts thereof to be repaired**
        - 8.1.3.8**            **Improve the ability of products or parts thereof to be upgraded**
        - 8.1.3.9**            **Design products and their constituent parts so that they can be reused**
        - 8.1.3.10**            **Design products and their constituent parts to be refurbished or remanufactured**
        - 8.1.3.11**            **Harvesting of reusable parts from end-of-life product**
        - 8.1.3.12**            **Plan recovery of certain substances or materials**
        - 8.1.3.13**            **Plan for material recycling**
      - 8.2**            **Emergency preparedness and response**
  - 9**            **Performance evaluation**
    - 9.1**            **Monitoring, measurement, analysis and evaluation**
      - 9.1.1**            **General**
      - 9.1.2**            **Evaluation of compliance**
    - 9.2**            **Internal audit**
    - 9.3**            **Management review**
  - 10**            **Improvement**
    - 10.1**            **General**
    - 10.2**            **Nonconformity and corrective action**
    - 10.3**            **Continual improvement**
- Annex A** (informative) Relationship between the circular economy and material circulation
- Annex B** (informative) Examples of interested parties
- Annex C** (informative) Material flow in material circulation
- Annex D** (informative) Case study on the redesign of an existing product
