

ISO 37170:2022-12 (E)

Smart community infrastructures - Data framework for infrastructure governance based on digital technology in smart cities

Contents		Page
Foreword		iv
Introduction		v
1	Scope	1
2	Normative references	1
3	Terms and definitions	1
4	General	2
5	Database	3
5.1	Geospatial data	3
5.1.1	General	3
5.1.2	Geospatial framework data	3
5.1.3	City unit grid data	3
5.2	Event data	4
5.2.1	Event classification	4
5.2.2	Event data coding	4
5.2.3	Event data attributes	4
5.3	Operation data	4
5.3.1	Overview	4
5.3.2	Event handling process data	4
5.3.3	Evaluation data of event handling results	4
5.4	System operation supporting data	5
5.4.1	Overview	5
5.4.2	User authentication configuration data	5
5.4.3	Regional configuration data	5
5.4.4	Organization configuration data	5
5.4.5	Workflow configuration data	5
5.4.6	Grid administrator configuration data	5
5.4.7	Map-related configuration data	5
5.4.8	Configuration data of data dictionary item	5
5.5	Metadata	5
5.6	Data updating	6
6	Data platform and system	6
6.1	Data capture system	6
6.2	Filing system	6
6.3	Collaborative work system	6
6.4	Monitoring system	6
6.5	Geocoding system	6
6.6	Evaluation system	6
6.7	Application maintenance system	7
6.8	Basic data resource management system	7
7	Governance and applications	7
8	Data sharing, security and privacy	7

Annex A (informative) Case studies	8
