ISO 37162:2023-11 (E)

Smart community infrastructures - Smart transportation for newly developing areas

Contents

Page

Foreword ... **iv**

Introduction ... **v**

1 Scope ... **1**

2 Normative references ... **1**

3 Terms and definitions ... **1**

4 Concept of smart transportation for newly developing areas ... **1**
4.1 General ... 1
4.2 Transportation modes for newly developing areas ... 2
4.2.1 General ... 2
4.2.2 Transportation modes applicable inside newly developing areas ... 2
4.2.3 Transportation modes applied between a newly developing area and regions outside the area ... 3

5 Adoption of smart transportation for newly developing areas ... **3**
5.1 General ... 3
5.2 Conditions for transportation mode selection ... 3
5.2.1 General ... 3
5.2.2 Transportation capacity ... 4
5.2.3 Service frequency ... 4
5.2.4 Stop/station interval ... 4
5.2.5 Geographical applicability ... 4
5.2.6 Running performance ... 4
5.2.7 Exclusive tracks and/or street lanes ... 4
5.2.8 Promotion of environmentally friendly vehicles and life-cycle performance ... 4
5.2.9 Coach convenience and safety ... 4
5.2.10 Town value and attractiveness ... 5
5.2.11 Emergency measures ... 5
5.2.12 Energy saving ... 5
5.2.13 Driverless operation applicability ... 5
5.2.14 On-time operation ... 5
5.2.15 Flexibility in track arrangements ... 5
5.3 Installation of smart transportation ... 5

6 Sustainability in quality of smart transportation for newly developing areas ... **5**
6.1 General ... 5
6.2 Parameters to be observed ... 6
6.3 Re-optimization of smart transportation conditions ... 6

Annex A (informative) **Transportation modes used in existing newly developing areas** ... **7**

Bibliography ... **10**
