Smart community infrastructures - Smart transportation for newly developing areas

| Contents | Page |
|------------------------------------------------------------------------------------------------------|-------------|
| Foreword | iv |
| Introduction | v |
| 1 Scope | 1 |
| 2 Normative references | 1 |
| 3 Terms and definitions | 1 |
| 4 Concept of smart transportation for newly developing areas | 1 |
| 4.1 General..... | 1 |
| 4.2 Transportation modes for newly developing areas..... | 2 |
| 4.2.1 General..... | 2 |
| 4.2.2 Transportation modes applicable inside newly developing areas..... | 2 |
| 4.2.3 Transportation modes applied between a newly developing area and regions outside the area..... | 3 |
| 5 Adoption of smart transportation for newly developing areas | 3 |
| 5.1 General..... | 3 |
| 5.2 Conditions for transportation mode selection..... | 3 |
| 5.2.1 General..... | 3 |
| 5.2.2 Transportation capacity..... | 4 |
| 5.2.3 Service frequency..... | 4 |
| 5.2.4 Stop/station interval..... | 4 |
| 5.2.5 Geographical applicability..... | 4 |
| 5.2.6 Running performance..... | 4 |
| 5.2.7 Exclusive tracks and/or street lanes..... | 4 |
| 5.2.8 Promotion of environmentally friendly vehicles and life-cycle performance..... | 4 |
| 5.2.9 Coach convenience and safety..... | 4 |
| 5.2.10 Town value and attractiveness..... | 5 |
| 5.2.11 Emergency measures..... | 5 |
| 5.2.12 Energy saving..... | 5 |
| 5.2.13 Driverless operation applicability..... | 5 |
| 5.2.14 On-time operation..... | 5 |
| 5.2.15 Flexibility in track arrangements..... | 5 |
| 5.3 Installation of smart transportation..... | 5 |
| 6 Sustainability in quality of smart transportation for newly developing areas | 5 |
| 6.1 General..... | 5 |
| 6.2 Parameters to be observed..... | 6 |
| 6.3 Re-optimization of smart transportation conditions..... | 6 |
| Annex A (informative) Transportation modes used in existing newly developing areas | 7 |
| Bibliography | 10 |
