Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Termsanddefinitions 1

4 Value, purpose and structure of the system 2
4.1 General 2
4.2 Value of utilizing seismometer systems 2
4.3 Purpose of use 3
4.4 Data specifications 3
4.5 Structure of the system 3

5 Utilization of seismometer data 5
5.1 General 5
5.1.1 Data acquisition 5
5.1.2 Data specifications 6
5.1.3 Devices and facilities available for data acquisition 6
5.2 Utilization of data before disasters 6
5.3 Utilization of data during disasters 7
5.4 Utilization of data after disasters 7

6 Functions of seismometers and data use 7
6.1 Purposes of using seismometer systems 7
6.2 Functions of seismometer systems 10

7 Ensuring availability and interoperability of seismometer data 11
7.1 Ensuring availability of seismometer data 11
7.2 Ensuring the interoperability of seismometer data 11

Annex A (informative) Example of seismometer data categorization selection 12

Annex B (informative) Recommended data table by category 13

Annex C (informative) Mapping the usage of seismometer systems for disaster risk reduction to the disaster-management process and the ISO 37123 indicators 16
