ISO 17620:2025-10 (E)

Biodiversity - Process for designing and implementing biodiversity net gain in development projects

Contents

Page

Foreword v

Introduction vi

1 Scope 1

2 Normative references 1

3 Terms and definitions 1

4 Abbreviated terms 4

5 Requirements for all stages of the BNG process 5
5.1 BNG requirements 5
5.2 Measuring change 6

6 Preparation 7
6.1 General 7
6.2 Recording a commitment to achieving BNG 7
6.3 Assessing the feasibility of achieving BNG 8
6.4 Informing decisions on project option appraisal 10

7 Environmental assessment and design 11
7.1 General 11
7.2 Environmental assessment 11
7.2.1 Establishing the project's biodiversity baseline 11
7.2.2 Assessing impacts and applying the mitigation hierarchy 12
7.2.3 Reporting the environmental impact assessment 13
7.3 Designing BNG 13
7.3.1 General 13
7.3.2 Setting and documenting measurable BNG targets 13
7.3.3 Applying the principle of like-for-like or better 14
7.3.4 Informing the project design 15
7.3.5 Consulting interested parties and stakeholders 15
7.3.6 BNG options 16
7.3.7 Avoiding then reducing the time lag between losses and net gains 16
7.3.8 Avoiding then reducing the distance between losses and net gains 17
7.3.9 Additionality 17
7.3.10 Making a long-term contribution towards conservation priorities 17
7.3.11 Prioritizing achievement of the project's BNG targets 18
7.3.12 Assessing feasibility of delivering BNG 18
7.3.13 Finalizing BNG design outputs 18
7.3.14 Management and monitoring plan 19
7.3.15 Handover from design to implementation 20
7.3.16 Design changes 20

8 Implementation 20
8.1 General 20
8.2 Site set up 20
8.3 Protecting existing biodiversity features 21
8.4 Importance of time of year 21

8.5 Recording during implementation works 21
8.6 BNG agreement 21
8.7 Handover from implementation to management 22

9 Management, monitoring and reporting 22
9.1 Implementation of the MMP 22
9.2 Monitoring 23
9.3 Record management 23
9.4 Reporting 23
9.5 Handover 24

10 Auditing 24

Annex A (informative) Elements for consideration at different stages of the process 25

Annex B (informative) Irreplaceable biodiversity features 27

Annex C (informative) Examples of BNG design measures 28

Annex D (normative) BBOP Principles on Biodiversity Offsets 30

Bibliography 31
