ISO 22959:2009-05 (E)

Animal and vegetable fats and oils - Determination of polycyclic aromatic hydrocarbon s by on-line donor-acceptor complex chromatography and HPLC with fluorescence detection

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Terms and definitions 1

4 Principle 2

5 Reagents, materials and standards 3

6 Apparatus 5

7 Sampling and preparation of the test sample 5

8 Sample preparation 6

9 Procedure 7
9.1 HPLC analysis 7
9.2 Identification of PAHs 7

10 Calculation of individual PAHs 7
11 Method validation data 8
11.1 Accuracy 8
11.2 Within-laboratory precision 8
11.3 Recovery 8
11.4 Dynamic range 8
11.5 Limit of quantification 8
12 Precision 9
12.1 International collaborative trial 9
12.2 Repeatability 9
12.3 Reproducibility 9
13 Test report 9

Annex A (informative) Example of the individual parts of an HPLC system 10

Annex B (informative) Example of the operating conditions of the pumps of the HPLC system 11

Annex C (informative) Example of the operating conditions of the column thermostat and the detector of the HPLC system 12

Annex D (informative) Example of the autosampler programme of the HPLC system 13

Annex E (informative) Tubing connections of the HPLC system 14

Annex F (informative) Chromatogram of a standard calibration sample 15

Annex G (informative) Determination precision for a sunflower oil, range 0,1 µg/kg to 3,5 µg/kg 16

Annex H (informative) Determination precision for an olive oil, range 0,1 µg/kg to 3,5 µg/kg 17

Annex I (informative) Determination precision for a soybean oil, range 0,1 µg/kg to 3,5 µg/kg 18

Annex J (informative) Determination precision for a coconut oil, range 0,1 µg/kg to 3,5 µg/kg 19

Annex K (informative) Interlaboratory test 20
