

# DIN EN ISO 16140:2011-12 (E)

## Microbiology of food and animal feeding stuffs - Protocol for the validation of alternative methods (ISO 16140:2003 + Amd. 1:2011)

---

<b>Contents</b>		<b>Page</b>
Introduction .....		4
1	Scope .....	5
2	Normative references .....	5
3	Terms and definitions .....	6
4	General principles for the validation and the certification of alternative methods .....	7
5	Qualitative methods - Technical protocol for their validation .....	8
6	Quantitative methods - Technical protocol for their validation .....	18
Annex A (normative) Specific rules for the acceptance of external results already obtained in a prior validation scheme .....		34
Annex B (informative) Classification of sample types for validation studies .....		36
Annex C (normative) Use of naturally contaminated samples and preparation of artificially contaminated samples in validation studies .....		39
Annex D (normative) Duplication of samples for the determination of relative accuracy and of relative detection level for qualitative methods .....		41
Annex E (normative) Calculation of the confidence intervals associated with the number of samples tested .....		43
Annex F (normative) Test applied to the examination of discordant results .....		44
Annex G (normative) Points to be considered when selecting strains for testing selectivity .....		45
Annex H (normative) Guidelines for the organisation and conducting collaborative studies .....		47
Annex I (normative) Determination that negative controls are free of target analyte .....		50
Annex J (normative) Replication of samples for interlaboratory studies of qualitative methods .....		51
Annex K (normative) Consideration of data .....		53
Annex L (informative) Interlaboratory study of qualitative methods: criteria of accordance, concordance and concordance odds ratio .....		54
Annex M (normative) Replication of samples for the determination of relative accuracy of quantitative methods .....		59
Annex N (normative) Examples of acceptable and unacceptable situations and range of measurements for the estimation of the regression line for quantitative methods .....		61
Annex (normative) Assessment of the linearity of quantitative methods by graphical representation .....		63

<b>Annex P (normative) Detection and quantification limits for counts .....</b>	<b>64</b>
<b>!Annex Q (normative) Calculation of Rousseeuw's scale estimator " .....</b>	<b>66</b>
<b>Annex R (normative) Calculations with the regression method .....</b>	<b>68</b>
<b>Annex S (normative) Examples of calculations for quantitative methods .....</b>	<b>73</b>
<b>Annex T (normative) Collaborative study - Ring test results with duplicates .....</b>	<b>78</b>
<b>Annex U (informative) List of symbols and abbreviations .....</b>	<b>79</b>
<b>!Annex V (informative) Indicators for Mandel's robust h- and k-statistics .....</b>	<b>80</b>
<b>Annex W (informative) Example: Determination of E. coli" .....</b>	<b>81</b>
<b>Bibliography .....</b>	<b>87</b>
