

DIN EN ISO 18415:2011-08 (E)

Cosmetics - Microbiology - Detection of specified and non-specified microorganisms (ISO 18415:2007)

Contents		Page
Foreword		3
Introduction		4
1	Scope	5
2	Normative references	5
3	Terms and definitions	6
4	Principle	7
5	Diluents and culture media	7
5.1	General	7
5.2	Diluent for the microbial suspension (tryptone sodium chloride solution)	7
5.3	Culture media	8
6	Apparatus and glassware	9
7	Strains of microorganism	9
8	Handling of cosmetic products and laboratory samples	10
9	Procedure	10
9.1	General recommendations	10
9.2	Preparation of the initial suspension in the enrichment broth	10
9.3	Incubation of the initial suspension	11
9.4	Isolation of specified and non-specified microorganisms	11
9.5	Procedure for identification of the specified microorganism: <i>Pseudomonas aeruginosa</i> ..	11
9.6	Procedure for identification of the specified microorganism: <i>Escherichia coli</i>	12
9.7	Procedure for identification of the specified microorganism: <i>Staphylococcus aureus</i>	12
9.8	Procedure for the identification of the specified microorganism: <i>Candida albicans</i>	13
9.9	Procedure for the identification of non-specified microorganisms	13
10	Expression of the results	14
10.1	Detection of specified microorganisms	14
10.2	Detection of non-specified microorganisms	14
10.3	Absence of microorganisms	14
11	Neutralization of the antimicrobial properties of the product	14
11.1	General	14
11.2	Preparation of inoculum	14
11.3	Validation of detection method by enrichment	15
12	Test report	16
Annex A (informative)	General scheme for identification of microorganisms	17
Annex B (informative)	Other Media	18
Annex C (informative)	Neutralizers of antimicrobial activity of preservatives and rinsing liquids	21
Bibliography		22
