ISO 14470:2011-12 (E)

Food irradiation - Requirements for the development, validation and routine control of the process of irradiati on using ionizing radiation for the treatment of food

Contents

Page

Foreword v

Introduction vi

1 Scope 1

2 Normative references 1

3 Terms and definitions 1

4 Controlling the food irradiation process 6
4.1 Responsibility and authority 6
4.2 Product realization 6
4.3 Monitoring, measurement and analysis 6
4.4 Technical agreement 6
4.5 Documentation 7

5 Irradiation facilities 7
5.1 Design 7
5.2 Radiation sources 7
5.3 Equipment 7
5.4 Personnel 8

6 Product 8
6.1 Product definition 8
6.2 Product specification 9

7 Process 9
7.1 Process definition -- Dose range 9
7.2 Process specification 9

8 Dosimetry 10

9 Validation 10
9.1 Installation qualification (IQ) 10
9.2 Operational qualification (OQ) 10
9.3 Performance qualification (PQ) 11
9.4 Review and approval of validation 13

10 Routine monitoring and control 13
10.1 Process parameters 13
10.2 Product-loading configuration 14
10.3 Routine dosimetry 14
10.4 Processing inventory control 14
10.5 Labelling 14
10.6 Process interruptions 15
10.7 Irradiation process records 15

11 Product release from irradiation process 15

12 Maintaining process effectiveness 15

12.1 Demonstration of continued effectiveness 15
12.2 Equipment calibration 15
12.3 Recalibration 16
12.4 Maintenance of equipment 16
12.5 Requalification of the irradiation process 16
12.6 Assessment of change 16

Annex A (informative) Guidelines 17
