

DIN EN ISO 11930:2013-10 (E)

Cosmetics - Microbiology - Evaluation of the antimicrobial protection of a cosmetic product (ISO 11930:2012, C orrected version 2013-05-01)

Contents		Page
Foreword		3
Introduction		4
1	Scope	5
1.1	Preservation efficacy test	5
1.2	Procedure for evaluating the antimicrobial protection of the cosmetic product	5
2	Normative references	6
3	Terms and definitions	6
4	Principle	7
5	Preservation efficacy test	7
5.1	General	7
5.2	Materials, apparatus, reagents and culture media	7
5.2.1	Materials - Apparatus	7
5.2.2	Diluents, neutralisers and culture media	8
5.3	Microbial strains	10
5.4	Preparation and enumeration of inocula	11
5.4.1	General	11
5.4.2	Preparation of bacterial and Candida albicans suspensions	11
5.4.3	Preparation of Aspergillus brasiliensis (previously A. niger) spores suspension	12
5.5	Demonstration of the neutraliser efficacy	13
5.5.1	Principle	13
5.5.2	Procedure	13
5.5.3	Calculations	13
5.5.4	Interpretation of results and conclusion on neutraliser efficacy	14
5.6	Determination of the preservation efficacy of the formulation	14
5.6.1	Procedure	14
5.6.2	Counting of colonies	15
5.6.3	Calculations	16
5.7	Interpretation of test results and conclusions	17
5.7.1	General case (the efficacy of neutraliser is demonstrated for all strains)	17
5.7.2	Case of formulations for which the efficacy of neutraliser is not demonstrated for some strains	17
5.8	Test report	18
6	Overall evaluation of the antimicrobial protection of the cosmetic product	19
6.1	General	19
6.2	Case 1 - The Preservation Efficacy test has been performed on the formulation	19
6.3	Case 2 - The Preservation Efficacy test has not been performed on the formulation	19
Annex A (normative)	Decision diagram	21
Annex B (normative)	Evaluation criteria for the Preservation Efficacy Test (5.7)	22
Annex C (informative)	Examples of neutralisers for the antimicrobial activity of preservatives and washing liquids	23

Annex D (informative) Packaging Characteristics	24
Bibliography	25
