Introduction 6

1 Scope 7

2 Normative references 7

3 Premises 8
3.1 General 8
3.2 Safety considerations 8
3.3 Laboratory design 8
3.4 Laboratory areas 9
3.5 Layout and fittings of the premises 10
3.6 Cleaning and disinfection 11

4 Staff 11
4.1 General 11
4.2 Competence 12
4.3 Verification of on-going staff competence 12
4.4 Hygiene 12

5 Apparatus and equipment 12
5.1 General 12
5.2 Protective cabinets 13
5.3 Balances and gravimetric diluters 14
5.4 Homogenizers, blenders and mixers 15
5.5 pH meter 16
5.6 Autoclave 17
5.7 Media preparator 18
5.8 Incubator 19
5.9 Refrigerator, cold-storage room 20
5.10 Freezer and deep freezer 21
5.11 Thermostatically controlled bath 21
5.12 Steamers, including boiling-water baths 23
5.13 Sterilizing oven 23
5.14 Microwave oven 24
5.15 Glass washer 25
5.16 Optical microscope 25
5.17 Gas burner or wire incinerator 2
5.18 Dispenser for culture media and reagents 26
5.19 Vortex mixer 27
5.20 Colony-counting device 27
5.21 Equipment for culture in a modified atmosphere 28
5.22 Centrifuge 28
5.23 Hotplate and heating mantle 29
5.24 Spiral plater 29
5.25 Stills, deionizers and reverse-osmosis units 30
5.26 Timers and timing devices 31
5.27 Pipettes and pipettors 31
5.28 Thermometers and temperature-monitoring devices, including automatic recorders 32

5.29 Immunomagnetic separator ... 33
5.30 Filtration system ... 34
5.31 Other equipment and software ... 34

6 Preparation of glassware and other laboratory materials ... 34
6.1 Preparation ... 34
6.2 Sterilization or decontamination ... 34
6.3 Disposable equipment and materials ... 35
6.4 Storage of clean glassware and materials ... 35
6.5 Management of sterile glassware and materials ... 35
6.6 Decontamination and disinfection ... 35
6.7 Waste management ... 36
6.8 Washing ... 36

7 Preparation and sterilization of culture media ... 36

8 Laboratory samples ... 36
8.1 Sampling ... 36
8.2 Transport ... 37
8.3 Receipt ... 37
8.4 Storage ... 38
8.5 Test portion ... 38

9 Examination ... 39
9.1 Hygienic precautions during analysis ... 39
9.2 Preparation of initial suspension and dilutions ... 40

10 Enumeration ... 41
10.1 General ... 41
10.2 Enumeration using a solid medium ... 41
10.3 Calculation and expression of results obtained with solid media ... 44
10.4 Enumeration of yeasts and moulds ... 51
10.5 Enumeration using a liquid medium ... 52

11 Detection method (qualitative method) ... 58
11.1 General ... 58
11.2 Principle ... 58
11.3 Measurement of uncertainty ... 59

12 Confirmation methods ... 59
12.1 General ... 59
12.2 Preparation of a pure culture ... 59
12.3 Gram's stain (modified Hucker technique) ... 59
12.4 Use of biochemical galleries for identification ... 61
12.5 Use of nucleic probes for identification ... 61
12.6 Serological methods ... 61

13 Test report ... 62

14 Validation of microbiological methods ... 63
14.1 Validation of reference methods ... 63
14.2 Validation of alternative methods ... 63
14.3 Validation of in-house methods ... 63

15 Quality assurance of results/quality control of performance ... 63
15.1 Internal quality control ... 63
15.2 Reference strains ... 63
15.3 External quality assessment (proficiency testing) ... 64

Annex A (informative) Properties of some disinfectants ... 65

Annex B (informative) Confidence intervals for colony count technique ... 66

B.1 Confidence intervals for colony count technique 66
B.2 Special cases with low numbers 67

Annex C (normative) Determination of most probable number 71

! ! Annex D (normative) Counting of colonies with two dishes per dilution 81

D.1 Introduction 8
D.2 Counting of colonies 81
D.3 Method of calculation: General case (counting of total colonies or typical colonies) 82
D.4 Method of calculation: Case after identification or confirmation 83
D.5 Method of calculation: Estimated counts 84
D.6 Special cases (counting of typical or presumed suspect colonies) 85
D.7 Method of calculation: Special cases 86
