Microbiology of the food chain - Sampling techniques for microbiological analysis of food and feed samples

Contents		Page
Foreword		iv
Introduction		v
1	Scope	1
2	Normative references	1
3	Terms and definitions	1
3.1	Sampling	1
3.2	Samples	2
3.3	Products	3
3.4	Sample handling	3
4	Principles and general requirements	4
5	Sampling plan	4
6	Personnel	5
6.1	General arrangements	5
6.2	Sampling personnel (samplers)	5
7	Sampling techniques	5
7.1	Equipment	5
7.2	Sampling techniques: General protocol	6
7.2.1	Bulk products (liquids, solids, powders, granules, etc.)	6
7.2.2	Packaged products (refrigerated, frozen, or ambient)	7
7.2.3	Refrigerated products	7
7.2.4	Separated frozen products	7
7.2.5	Blocks of frozen products (e.g. meat or fish)	8
7.2.6	Ambient products	8
7.2.7	Hot products	8
7.2.8	Consumer portions in restaurants	9
7.3	Sampling techniques for specific products	9
7.3.1	Live shellfish (bivalve molluscs, gastropods, echinoderms, and tunicates)	9
7.3.2	Fruits and vegetables, spices and herbs, coffee, tea, etc	10
7.3.3	Whole eggs	10
7.3.4	Canned food	10
7.3.5	Feeds	10
7.3.6	Special cases, e.g. neck skin of poultry or carcass rinses	10
7.3.7	Spoiled samples	10
7.3.8	Sampling with automatic apparatus	10
8	Packing and labelling of samples	11
9	Preparation of a sampling form (sampling report)	11
10	Transport	11
10.1	Apparatus and equipment	12
10.1.1	Refrigerators, freezers, cool boxes, boxes or containers, cold packs	12
10.1.2	Temperature-monitoring equipment	12

10.2	Transport protocol	12
10.2.1	Transport by the laboratory	13
10.2.2	Transport by a contractor or courier	13
11	Reception at the laboratory	14
Annex A (informative)	Flow chart of sampling	15
Annex B (informative)	Method for sampling a frozen piece or block (from ISO 6887-1)	16
Bibliography	17
